Subject: R-IV Conference

Attachments: 5-24-17 R-IV Reg List - ALL.xlsx; 5-29-17 R-IV AAMVA Staff Reg List.pdf; 5-29-17 R-IV
Federal Reg List.pdf; 5-29-17 R-IV Guest Reg List.pdf; 5-29-17 R-IV Industry Reg List.pdf;
5-29-17 R-IV Juris Reg List.pdf

Hello Region IV Conference Participants,

On behalf of Past President Pat Kohler, thanks for joining us in Seattle last week for this year's Region IV conference. We hope you enjoyed the conference and found it worthy of your time.

Attached are registration lists for conference attendees. The Excel spreadsheet contains information for all attendees. The .pdf documents list jurisdictional, industry, guests, federal representatives and AAMVA staff.

Presentations will be posted to the AAMVA website soon.

On a personal note, thanks so much for the great send-off to retirement! I can't imagine a more perfect evening. It is one I will never forget. I mean how many people have sat on a baby grand piano with dozens of handsome men singing "She's Lost That Loving Feeling" to them? I was humbled to receive your kind words and kindnesses. I will miss my AAMVA family and wish you all the best, both personally and professionally. Be happy, healthy and safe!!

Thanks again!

Sheila

Subject: S2S GC Meeting Updates
Attachments: Section 0 S2S Governance Committee Meeting Schedule of Events 06.01.2017.docx

Good morning,

I hope everyone had a nice long weekend. We have updated the S2S Governance Committee Meeting Schedule of Events to reflect a welcome dinner tomorrow, May 31, 2017 at 6:30 p.m. Dinner reservations have been made at Rustico Ballston, which is a very short walk from your hotel. The address for the restaurant is 4075 Wilson Blvd, Arlington, VA 22217 and their phone is (571) 384-1820.

If you have any problems with your travels please feel free to contact me at (703) 887-9002. Thank you and I look forward to meeting all of you on Thursday.

Subject: June S2S Governance Committee Meeting

Good evening,

All documents that will be presented at next week's S2S Governance Committee face-to-face meeting have been loaded on the SharePoint site. We have also included an expense report so that you can log your travel related expenses.

<https://share.aamva.org/membersvc/commwg/aamvaboard/s2sgc/Meeting%20Materials/Forms/Folder%20View.aspx?RootFolder=%2fmembersvc%2fcommwg%2faamvaboard%2fs2sgc%2fMeeting%20Materials%2f2017%2d06%20Meeting&FolderCTID=0x012000CA471E8289F4F84EB8433018455E9AD2>.

The Schedule of Events is posted on the site to give you a feel for how the day will flow. AAMVA will be providing a continental breakfast at 8:30 for all of you to enjoy. We will also be providing light snacks and a lunch.

Unfortunately, not everyone will be able to attend the meeting so in an effort to make sure no one is left out I have set-up a GoToMeeting for the entire day. For those of you who are traveling if you have any problems please feel free to contact me. Thank you and I look forward to meeting all of you next Thursday.

S2S GC F2F Meeting

Thu, Jun 1, 2017 9:00 AM - 5:00 PM EDT

Please join my meeting from your computer, tablet or smartphone.

Hi AK,

Attached is the testing status report and updated test case plan. We have completed as much as we can of the Readiness Testing. I'm not sure when we will have the Theft file access working, and I validated that the format is correct via your screenshot so we can move forward with the scenario testing when you are ready.

Thanks,

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,

Susan Creighton / 703.908.5893 office

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- o VIN (VVHIDN) from the NT message
- o SOT (VTIJUR) from the NT message
- o Title Number (VTINUM) from the NT message
- o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- o See Appendix A for remaining NCB and MEC (02/3) block settings
- o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Hello Susan,

I'm seeing your SD requests get bounced back. I'm looking into it.

Subject: RE: AK - NMVTIS Readiness Testing R06

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVJI	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

0.19.36 - Vehicle Use Class Code			
The utilization of the vehicle.		Source of Definition: MVA Source of Data: Accident report, registration, MVA Synonyms: Special Use, Usage Class.	
Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown
VVH/CC		Logical Format (Type/Max Length): AN/2	
Format: Alpha-numeric	Size: 2	CUM-YD6-USE-CLASS	

I can make the change which will default these values to "00" for "None (not in use)" if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska's intention at this time is not to collect this data?

Thank you for your time and help,

 Hi Dillon, thanks for the update.

Attached is the Defect Status Report that I promised I would try to have out each Friday. I am also attaching an updated Test Case Plan which denotes the test cases completed, etc. Please let me know if you have any questions.

Thanks,
 Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.

I mistook that parameter as being amongst the "optional" parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I'm attempting to address the issue with owner names. Meanwhile, I'm passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE
parameter

There appears to be no way to support this

06/4 VVHNAX VEHICLE NUMBER OF AXLES
obtaining a non-null value

There appears to be no non-null data nor method of

I believe I've addressed all other issues. I'll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT
------	--------	--------------------

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME	– Will be set to REC to have brand 10
06/3	VVHBST	VEHICLE/VESSEL BODY TYPE	– From what I can tell this is supposed to map to “CP”

(Coupe)? **Yes**

Just needed additional data.

06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR	- added secondary color
06/3	VVHNLN	NUMBER OF ACTIVE LIENS	– should have previously been 0, now 1
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER	- added equipment number
30/6	VLHNAM	LIENHOLDER	- added lienholder
30/8	VLHADD	LIENHOLDER ADDRESS	- added lienholder
34/1	VOWNAM	OWNER NAME	- added additional owners

Code changes.

06/3	VVHLEI	VEHICLE LEASE INDICATOR	- fixed mapping
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	- fixed mapping
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT	- fixed mapping
26/4	VODDTE	ODOMETER DATE	- was supposed to already have been mapped to title date, system doesn't ask for / obtain this information

If you haven't already please check as to why this did not return the title date in this field.

30/7	VLNDAT	LIEN DATE	- mapped to title date, system doesn't ask for / obtain this information
------	--------	-----------	--

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3	VTIPJU	PREVIOUS TITLING JURISDICTION	The previous title was Alaska
------	--------	-------------------------------	--------------------------------------

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4	VVHUCC	VEHICLE USE CLASS CODE	This is in the online spec in Appendix D (search on use case)
------	--------	------------------------	--

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,

Subject: RE: AK - NMVTIS Readiness Testing R02A

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Do you need screenshots of the IU/IT which are sent before the UA?

Here is the UA and message log after using the help desk function:

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C. In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13				
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X	
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222				
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X

As for which code is the same, perhaps this diagram will help.

Non-white backgrounds indicate color-coordinated shared code, with the exception of the solid blue starting nodes.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality...but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Regards,

Mina Peters

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey <CGarber@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

- 1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
- 2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
- 3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.

The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.

The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor “implementation” of the second endpoint. I will revert the previous change I made this morning to the existing NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

This email comes from an external source, so remember, Think Before You Click!

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

Ok, I think we won't have to test it separately, but I'm checking to be sure. In the meantime, let's go ahead with R02B.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

It's the NMVTIS menu on the mainframe. Use PF9 from the vehicle menu.

If the help desk application is indeed separate as previously indicated, I do not have access to it.

I've reach out to David for clarification, in the meantime would it be possible to continue the readiness test for the main application?

Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

Thanks,

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

I've made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

The screenshot displays the 'Network Message Log' application window. The title bar includes standard Windows navigation icons and the URL 'http://mvaic.com/be...'. Below the title bar is a menu bar with options: File, View, Tools, Admin, and Help. A toolbar contains icons for back, forward, search, and other functions.

The main area features a 'Log Message' section with a table listing network messages. The table has columns for ID, App, Type, Desc, MD, TO, FRC, Location, and Date. Two rows are highlighted in red:

ID	App	Type	Desc	MD	TO	FRC	Location	Date
1706110913040009	22	RJ	AZ	00	AZ	N	1706110913080000 JMWITD	
1706110913040007	22	RJ	AZ	00	AZ	N	1706110913080000 JMWITD	
1706110913040006	22	RJ	AZ	00	AZ	N	1706110913080000 JMWITD

After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Ok, let me check the data. I have to copy our business team on all emails so I'm adding Casey.

Thanks,
Susan Creighton / 703.908.5893 office

Hi AK,

Attached are the minutes for today's meeting. Please let me know if I missed or misstated anything.

Please don't hesitate to let me know if you have questions.

Thanks,

Susan Creighton | Lead Systems Analyst - Quality Assurance Vehicles |AAMVA | 4401 Wilson Blvd, Ste 700, Arlington, VA 22203 | 703.908.5893 | screighton@aamva.org | www.aamva.org

Hi Dillon,

I found this online when I looked up Food Truck: 2013 14' Ford E450 Step Van

Please make sure you have set up the data that is highlighted yellow and gold in the scenario test cases and updated the Test Case Plan (TCP) with the data you are using. Please use the TCP I sent on Friday and then provide a copy of back to me. We need to have this completed before we start as I need that data in order to update my test tool.

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I'm ready to start. Could you give me an example of what a food wagon make/model would be? In the meantime I'm checking whether it matters for any make/model with code 33.

Thank you,

Hi AK,

Attached is the testing status report and updated test case plan. We have completed as much as we can of the Readiness Testing. I'm not sure when we will have the Theft file access working, and I validated that the format is correct via your screenshot so we can move forward with the scenario testing when you are ready.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I've hit my forty and it seems like we've done what we can. I'm going to take off for the day. We'll pick it up on Tuesday.

Have a great weekend!

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,

Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Subject: RE: AK - NMVTIS Readiness Testing

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,

Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- o VIN (VVHIDN) from the NT message
- o SOT (VTIJUR) from the NT message
- o Title Number (VTINUM) from the NT message
- o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- o See Appendix A for remaining NCB and MEC (02/3) block settings
- o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVJI	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

0.19.36 - Vehicle Use Class Code			
The utilization of the vehicle.		Source of Definition: MVA Source of Data: Accident report, registration, MVA Synonyms: Special Use, Usage Class.	
Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown
VVH/CC			
Format=Alpha-numeric		Logical Format (Type/Max Length): AN/2	
Size=2		CONF-YD6-USE-CLASS	

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.

I mistook that parameter as being amongst the "optional" parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I'm attempting to address the issue with owner names. Meanwhile, I'm passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE
parameter

There appears to be no way to support this

06/4 VVHNAX VEHICLE NUMBER OF AXLES
obtaining a non-null value

There appears to be no non-null data nor method of

I believe I've addressed all other issues. I'll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT
------	--------	--------------------

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Cc: Garber, Casey; Chaudhry, Amir; David Nolen, AK Dept. of Administration; Mina Peters, AK Dept. of Administration
Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME	– Will be set to REC to have brand 10
06/3	VVHBST	VEHICLE/VESSEL BODY TYPE	– From what I can tell this is supposed to map to “CP”

(Coupe)? **Yes**

Just needed additional data.

06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR	- added secondary color
06/3	VVHNLN	NUMBER OF ACTIVE LIENS	– should have previously been 0, now 1
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER	- added equipment number
30/6	VLHNAM	LIENHOLDER	- added lienholder
30/8	VLHADD	LIENHOLDER ADDRESS	- added lienholder
34/1	VOWNAM	OWNER NAME	- added additional owners

Code changes.

06/3	VVHLEI	VEHICLE LEASE INDICATOR	- fixed mapping
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	- fixed mapping
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT	- fixed mapping
26/4	VODDTE	ODOMETER DATE	- was supposed to already have been mapped to title date, system doesn't ask for / obtain this information

If you haven't already please check as to why this did not return the title date in this field.

30/7	VLNDAT	LIEN DATE	- mapped to title date, system doesn't ask for / obtain this information
------	--------	-----------	--

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3	VTIPJU	PREVIOUS TITLING JURISDICTION	The previous title was Alaska
------	--------	-------------------------------	--------------------------------------

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4	VVHUCC	VEHICLE USE CLASS CODE	This is in the online spec in Appendix D (search on use case)
------	--------	------------------------	--

Thank you,

Dillon Salsman-Pressley • Programmer Analyst

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBS	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C. In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk
R02A	Send a Used Vehicle Inquiry (IU) <i>all optional and required fields should be populated</i>	AICASUALCURRTC003				P
R02B	Send a Used Vehicle Inquiry (IU) <i>Inquire using VIN/SOT/and Title#</i>	ZFF70RCA2B0177029	<i>S7</i>	<i>NOMATCHTITLE</i>		P

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13				
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X	
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222				
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X

As for which code is the same, perhaps this diagram will help.

Non-white backgrounds indicate color-coordinated shared code, with the exception of the solid blue starting nodes.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality...but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Regards,

Mina Peters

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey <CGarber@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

- 1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
- 2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
- 3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.

The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.

The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor “implementation” of the second endpoint. I will revert the previous change I made this morning to the existing NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

Susan Creighton / 703.908.5893 office

Ok, I think we won't have to test it separately, but I'm checking to be sure. In the meantime, let's go ahead with R02B.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

It's the NMVTIS menu on the mainframe. Use PF9 from the vehicle menu.

If the help desk application is indeed separate as previously indicated, I do not have access to it.

I've reach out to David for clarification, in the meantime would it be possible to continue the readiness test for the main application?

Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

Thanks,

I've made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

The screenshot shows a web browser window with the address bar displaying 'http://dmvvaicunidev1:'. The page title is 'Network Message Log'. The browser has a menu bar with 'Edit', 'View', 'Tools', 'Admin', and 'Help'. Below the menu bar is a search bar labeled 'Log Message'.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Thanks,
Susan Creighton / 703.908.5893 office

From: Creighton, Susan
Sent: Thursday, May 11, 2017 11:20 AM
To: 'Dillon Salsman'
Cc: Garber, Casey
Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Ok, let me check the data. I have to copy our business team on all emails so I'm adding Casey.

Thanks,
Susan Creighton / 703.908.5893 office

Parameter List

- ☐ Log App Message
- ☐ Message Control
- ☐ Message Control Destination
- ☐ Message Control Expected Response
- ☐ System Error Log
- ☐ Event Log

The screenshot shows the "UN Message - Internet Explorer" window. The address bar displays the URL: http://drivancunidev1.dem.joc/VN/MessageDetail.aspx. The main content area is titled "Message Detail" and features a "Send" button. Below the title bar, there are tabs for "Application", "Message Type", "From Origin", "Origin", and "Destination". The current view shows the following details:

Application	Message Type	From Origin	Origin	Destination
ZZ	FU	AJ	AJ	OO

Below the tabs, there is a section for "Message [AMIE]" with a "Text" dropdown menu. The message content is displayed as follows:

```
02301170511035290000 10W110
062012FF70RCA2B0177029
26291INOMATCHTITLE      ST
```

Underneath the message content, there is a section for "NCB Block" which contains a table listing various fields and their values:

Action	#	Description	Data
E0A1	001	TRANSACTION CODE	
E0A2	004	Message Length	0264
E0A3	009	Message Destination	00
E0A4	014	Message Origin	AJ
E0A5	023	Message Date	170511
E0A6	029	Message Time	103529
E0A7	035	Message Sequence ID	0000
E0A8	039	Application ID	24
E0A9	041	Message Type	FU
E0AB	049	Segment Sequence Number	01
E0AC	045	Last Segment Indicator	Y
E0AD	044	Number of Test Blocks Count	03
E0AE	049	Network Session Indicator	Y
E0AF	049	Test/Production Indicator	T
E0B0	050	Transmit Mode Code	1
E0B1	051	NIB Error Code	M
E0B2	052	Transaction Originator	AJ
E0B3	059	Network Status	00
E0B4	041	Application Status	

At the bottom of the screen, there are two expandable sections: "NCB Block Miscellaneous" and "Parameter List".

- ☐ Log App Message
- ☐ Message Control
- ☐ Message Control Destination
- ☐ Message Control Expected Response
- ☐ System Error Log
- ☐ Event Log

Subject: RE: AK - NMVTIS Readiness Testing

Good morning Susan,

I'm ready to start. Could you give me an example of what a food wagon make/model would be? In the meantime I'm checking whether it matters for any make/model with code 33.

Thank you,

Hi AK,

Attached is the testing status report and updated test case plan. We have completed as much as we can of the Readiness Testing. I'm not sure when we will have the Theft file access working, and I validated that the format is correct via your screenshot so we can move forward with the scenario testing when you are ready.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I've hit my forty and it seems like we've done what we can. I'm going to take off for the day. We'll pick it up on Tuesday.

Have a great weekend!

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,

Susan Creighton / 703.908.5893 office

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

R08 passed.

Please execute R09. This time, in addition to the screenshots you have been sending, please also send screenshots of what is displayed to the titling/helpdesk agent for the inquiry as well as each screen they enter data to or receive data back.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

This email comes from an external source, so remember, Think Before You Click!
Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- o VIN (VVHIDN) from the NT message
- o SOT (VTIJUR) from the NT message
- o Title Number (VTINUM) from the NT message
- o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- o See Appendix A for remaining NCB and MEC (02/3) block settings
- o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVJI	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

0.19.36 Vehicle Use Class Code			
The utilization of the vehicle.		Source of Definition: MEAs Source Of Data: Accident report, registration, NVA Synonyms: Special Use, Usage Class.	
Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Test	97	Other
07	Transportation of property	99	Unknown
VVHUCC		Logical Format (Type/Max Length): AN/2	
Format: Alpha-numeric		Size: 2	
		CONF: VEH-USE-CLASS	

I can make the change which will default these values to "00" for "None (not in use)" if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska's intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously. I mistook that parameter as being amongst the "optional" parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I'm attempting to address the issue with owner names. Meanwhile, I'm passing the questions about following parameters on to DMV:

06/4	VVHUCC	VEHICLE USE CLASS CODE	There appears to be no way to support this parameter
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	There appears to be no non-null data nor method of obtaining a non-null value

I believe I've addressed all other issues. I'll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND

02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVJI	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVJI and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIIJR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT
------	--------	--------------------

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey; Chaudhry, Amir; David Nolen, AK Dept. of Administration; Mina Peters, AK Dept. of Administration
Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME	– Will be set to REC to have brand 10
06/3	VVHBST	VEHICLE/VESSEL BODY TYPE	– From what I can tell this is supposed to map to “CP”

(Coupe)? **Yes**

Just needed additional data.

06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR	- added secondary color
06/3	VVHNLN	NUMBER OF ACTIVE LIENS	– should have previously been 0, now 1
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER	- added equipment number
30/6	VLHNAME	LIENHOLDER	- added lienholder
30/8	VLHADD	LIENHOLDER ADDRESS	- added lienholder
34/1	VOWNAM	OWNER NAME	- added additional owners

Code changes.

06/3	VVHLEI	VEHICLE LEASE INDICATOR	- fixed mapping
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	- fixed mapping
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT	- fixed mapping
26/4	VODDTE	ODOMETER DATE	- was supposed to already have been mapped to title date, system doesn't ask for / obtain this information
30/7	VLNDAT	LIEN DATE	- mapped to title date, system doesn't ask for / obtain this information

If you haven't already please check as to why this did not return the title date in this field.

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3	VTIPJU	PREVIOUS TITLING JURISDICTION	The previous title was Alaska
------	--------	-------------------------------	--------------------------------------

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4	VVHUCC	VEHICLE USE CLASS CODE	This is in the online spec in Appendix D (search on use case)
------	--------	------------------------	--

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C. In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13				
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X	
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222				
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X

As for which code is the same, perhaps this diagram will help.

Non-white backgrounds indicate color-coordinated shared code, with the exception of the solid blue starting nodes.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality...but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey <CGarber@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

- 1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
- 2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
- 3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.

The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.

The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor “implementation” of the second endpoint. I will revert the previous change I made this morning to the existing NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

This email comes from an external source, so remember, Think Before You Click!

Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

I've made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

The screenshot shows the 'Network Message Log' application interface. The main window displays a table of log messages. The selected message is highlighted in red.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Thanks,
Susan Creighton / 703.908.5893 office

From: Creighton, Susan
Sent: Thursday, May 11, 2017 11:20 AM
To: 'Dillon Salsman'
Cc: Garber, Casey
Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Ok, let me check the data. I have to copy our business team on all emails so I'm adding Casey.

Thanks,
Susan Creighton / 703.908.5893 office

From: Dillon Salsman [<mailto:dsalsman@resdat.com>]

Hi AK,

Attached are the minutes for today's meeting. Please let me know if I missed or misstated anything.

Please don't hesitate to let me know if you have questions.

Thanks,

Susan Creighton | Lead Systems Analyst - Quality Assurance Vehicles |AAMVA | 4401 Wilson Blvd, Ste 700, Arlington, VA 22203 | 703.908.5893 | screighton@aamva.org | www.aamva.org

Subject: RE: AK - NMVTIS Readiness Testing

Hello Susan,

I'm still working on executing the test case. Running into non-UNI-related validation issues. Thank you for looking that up. Still waking up and I didn't realize we have a code that corresponded directly to Food Wagon, so I could've just searched production data. I'll let you know as soon as it's done.

Thank you,

Hi Dillon,

I found this online when I looked up Food Truck: 2013 14' Ford E450 Step Van

Please make sure you have set up the data that is highlighted yellow and gold in the scenario test cases and updated the Test Case Plan (TCP) with the data you are using. Please use the TCP I sent on Friday and then provide a copy of back to me. We need to have this completed before we start as I need that data in order to update my test tool.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Good morning Susan,

I'm ready to start. Could you give me an example of what a food wagon make/model would be? In the meantime I'm checking whether it matters for any make/model with code 33.

Thank you,

Hi AK,

Attached is the testing status report and updated test case plan. We have completed as much as we can of the Readiness Testing. I'm not sure when we will have the Theft file access working, and I validated that the format is correct via your screenshot so we can move forward with the scenario testing when you are ready.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I've hit my forty and it seems like we've done what we can. I'm going to take off for the day. We'll pick it up on Tuesday.

Have a great weekend!

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it “junked” and it’s different than brand code 8 “junk”) to the vehicle. Let me ask Debra.

In the meantime, I can do the version you’re describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I’m validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I’m not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don’t see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

Hi Dillon,

Yes, I can work on it this morning. I'll re-drive the NT now.

Thanks,
Susan Creighton / 703.908.5893 office

No worries, I've reverted the change.

I managed to make in a little earlier this morning. I wouldn't mind starting on the rest of the solicited cases if you're available.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- o VIN (VVHIDN) from the NT message
- o SOT (VTIJUR) from the NT message
- o Title Number (VTINUM) from the NT message
- o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- o See Appendix A for remaining NCB and MEC (02/3) block settings
- o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Hi Dillon,

R07 passed.

R11 has just 1 issue on the C3:

26/3 VTIPJU PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE

Thanks,

Susan Creighton / 703.908.5893 office

From: Dillon Salsman [<mailto:dsalsman@resdat.com>]

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVJI	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

0.19.36 - Vehicle Use Class Code			
The utilization of the vehicle.		Source of Definition: MVA Source of Data: Accident report, registration, MVA Synonyms: Special Use, Usage Class.	
Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown
VVM/CC			
Format=Alpha-numeric Size=2 CUM-YD6-USE-CLASS Logical Format (Type/Max Length): AN/2			

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.

I mistook that parameter as being amongst the "optional" parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT
------	--------	--------------------

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME	– Will be set to REC to have brand 10
06/3	VVHBST	VEHICLE/VESSEL BODY TYPE	– From what I can tell this is supposed to map to “CP”

(Coupe)? **Yes**

Just needed additional data.

06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR	- added secondary color
06/3	VVHNLN	NUMBER OF ACTIVE LIENS	– should have previously been 0, now 1
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER	- added equipment number
30/6	VLHNAM	LIENHOLDER	- added lienholder
30/8	VLHADD	LIENHOLDER ADDRESS	- added lienholder
34/1	VOWNAM	OWNER NAME	- added additional owners

Code changes.

06/3	VVHLEI	VEHICLE LEASE INDICATOR	- fixed mapping
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	- fixed mapping
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT	- fixed mapping
26/4	VODDTE	ODOMETER DATE	- was supposed to already have been mapped to title date, system doesn't ask for / obtain this information

If you haven't already please check as to why this did not return the title date in this field.

30/7	VLNDAT	LIEN DATE	- mapped to title date, system doesn't ask for / obtain this information
------	--------	-----------	--

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3	VTIPJU	PREVIOUS TITLING JURISDICTION	The previous title was Alaska
------	--------	-------------------------------	--------------------------------------

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4	VVHUCC	VEHICLE USE CLASS CODE	This is in the online spec in Appendix D (search on use case)
------	--------	------------------------	--

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBS	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,

Subject: RE: AK - NMVTIS Readiness Testing R02A

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C. In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03

As for which code is the same, perhaps this diagram will help.

Non-white backgrounds indicate color-coordinated shared code, with the exception of the solid blue starting nodes.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality...but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey <CGarber@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

- 1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
- 2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
- 3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.

The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.

The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor “implementation” of the second endpoint. I will revert the previous change I made this morning to the existing NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Subject: RE: AK - NMVTIS Readiness Testing

Hello Susan,

I'm still working on executing the test case. Running into non-UNI-related validation issues. Thank you for looking that up. Still waking up and I didn't realize we have a code that corresponded directly to Food Wagon, so I could've just searched production data. I'll let you know as soon as it's done.

Thank you,

Hi Dillon,

I found this online when I looked up Food Truck: 2013 14' Ford E450 Step Van

Please make sure you have set up the data that is highlighted yellow and gold in the scenario test cases and updated the Test Case Plan (TCP) with the data you are using. Please use the TCP I sent on Friday and then provide a copy of back to me. We need to have this completed before we start as I need that data in order to update my test tool.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Good morning Susan,

I'm ready to start. Could you give me an example of what a food wagon make/model would be? In the meantime I'm checking whether it matters for any make/model with code 33.

Thank you,

Hi AK,

Attached is the testing status report and updated test case plan. We have completed as much as we can of the Readiness Testing. I'm not sure when we will have the Theft file access working, and I validated that the format is correct via your screenshot so we can move forward with the scenario testing when you are ready.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I've hit my forty and it seems like we've done what we can. I'm going to take off for the day. We'll pick it up on Tuesday.

Have a great weekend!

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it “junked” and it’s different than brand code 8 “junk”) to the vehicle. Let me ask Debra.

In the meantime, I can do the version you’re describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I’m validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I’m not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don’t see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Hello Susan,

I would appreciate it if you could reset the record.

I've been here for a just over 8 hours straight myself so I don't mind stopping for the day.

Thank you,

Sorry, typo. Should be R03 instead of R09 which I corrected below.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- o VIN (VVHIDN) from the NT message
- o SOT (VTIJUR) from the NT message
- o Title Number (VTINUM) from the NT message
- o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- o See Appendix A for remaining NCB and MEC (02/3) block settings
- o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Hi Dillon,

R07 passed.

R11 has just 1 issue on the C3:

26/3 VTIPJU PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE

Thanks,

Susan Creighton / 703.908.5893 office

From: Dillon Salsman [<mailto:dsalsman@resdat.com>]

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVJI	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

0.19.36 - Vehicle Use Class Code			
The utilization of the vehicle.		Source of Definition: MVA Source of Data: Accident report, registration, MVA Synonyms: Special Use, Usage Class.	
Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown
VVM/CC			
Format=Alpha-numeric Size=2 CUMF-YD6-USE-CLASS		Logical Format (Type/Max Length): AN/2	

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.

I mistook that parameter as being amongst the "optional" parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I'm attempting to address the issue with owner names. Meanwhile, I'm passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE
parameter

There appears to be no way to support this

06/4 VVHNAX VEHICLE NUMBER OF AXLES
obtaining a non-null value

There appears to be no non-null data nor method of

I believe I've addressed all other issues. I'll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT
------	--------	--------------------

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Cc: Garber, Casey; Chaudhry, Amir; David Nolen, AK Dept. of Administration; Mina Peters, AK Dept. of Administration
Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME	– Will be set to REC to have brand 10
06/3	VVHBST	VEHICLE/VESSEL BODY TYPE	– From what I can tell this is supposed to map to “CP”

(Coupe)? **Yes**

Just needed additional data.

06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR	- added secondary color
06/3	VVHNLN	NUMBER OF ACTIVE LIENS	– should have previously been 0, now 1
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER	- added equipment number
30/6	VLHNAM	LIENHOLDER	- added lienholder
30/8	VLHADD	LIENHOLDER ADDRESS	- added lienholder
34/1	VOWNAM	OWNER NAME	- added additional owners

Code changes.

06/3	VVHLEI	VEHICLE LEASE INDICATOR	- fixed mapping
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	- fixed mapping
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT	- fixed mapping
26/4	VODDTE	ODOMETER DATE	- was supposed to already have been mapped to title date, system doesn't ask for / obtain this information

If you haven't already please check as to why this did not return the title date in this field.

30/7	VLNDAT	LIEN DATE	- mapped to title date, system doesn't ask for / obtain this information
------	--------	-----------	--

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3	VTIPJU	PREVIOUS TITLING JURISDICTION	The previous title was Alaska
------	--------	-------------------------------	--------------------------------------

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4	VVHUCC	VEHICLE USE CLASS CODE	This is in the online spec in Appendix D (search on use case)
------	--------	------------------------	--

Thank you,

Dillon Salsman-Pressley • Programmer Analyst

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,

Subject: RE: AK - NMVTIS Readiness Testing R02A

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C. In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13				
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X	
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222				
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X

Cc: Garber, Casey <CGarber@aamva.org>; Chaudhry, Amir <AChaudhry@aamva.org>
Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality...but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Regards,

Mina Peters

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

To: 'Creighton, Susan' <screighton@aamva.org>; David Nolen, AK Dept. of Administration <david.nolen@alaska.gov>
Cc: Garber, Casey <CGarber@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

- 1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
- 2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
- 3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.

The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.

The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Cc: Garber, Casey; Mina Peters, AK Dept. of Administration; David Nolen, AK Dept. of Administration
Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor “implementation” of the second endpoint. I will revert the previous change I made this morning to the existing NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

Subject: RE: AK - NMVTIS Readiness Testing R03

This email comes from an external source, so remember, Think Before You Click!

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

Susan Creighton / 703.908.5893 office

I received confirmation that we do not need to test the helpdesk separately.

R02B passed.

Let's move on to R03

Thanks,

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

It's the NMVTIS menu on the mainframe. Use PF9 from the vehicle menu.

If the help desk application is indeed separate as previously indicated, I do not have access to it.

I've reach out to David for clarification, in the meantime would it be possible to continue the readiness test for the main application?

Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

Thanks,

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

I've made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

The screenshot shows a web browser window with the address bar displaying 'http://dmvvaicunidev1:'. The page title is 'Network Message Log'. The browser has a menu bar with 'Edit', 'View', 'Tools', 'Admin', and 'Help'. Below the menu bar is a search bar labeled 'Log Message'.

The main content area displays a table of log messages. The table has columns: ID, App, Type, Dev, ID, ID, Err, Source, and Date. The messages are listed in descending order of ID. The 10th message (ID 1706110913080002) is highlighted in red.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Subject: RE: AK - NMVTIS Readiness Testing

Hello Susan,

I'm still working on executing the test case. Running into non-UNI-related validation issues. Thank you for looking that up. Still waking up and I didn't realize we have a code that corresponded directly to Food Wagon, so I could've just searched production data. I'll let you know as soon as it's done.

Thank you,

Hi Dillon,

I found this online when I looked up Food Truck: 2013 14' Ford E450 Step Van

Please make sure you have set up the data that is highlighted yellow and gold in the scenario test cases and updated the Test Case Plan (TCP) with the data you are using. Please use the TCP I sent on Friday and then provide a copy of back to me. We need to have this completed before we start as I need that data in order to update my test tool.

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I'm ready to start. Could you give me an example of what a food wagon make/model would be? In the meantime I'm checking whether it matters for any make/model with code 33.

Thank you,

Hi AK,

Attached is the testing status report and updated test case plan. We have completed as much as we can of the Readiness Testing. I'm not sure when we will have the Theft file access working, and I validated that the format is correct via your screenshot so we can move forward with the scenario testing when you are ready.

Thanks,

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- o VIN (VVHIDN) from the NT message
- o SOT (VTIJUR) from the NT message
- o Title Number (VTINUM) from the NT message
- o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- o See Appendix A for remaining NCB and MEC (02/3) block settings
- o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

Dillon Salsman-Pressley • Programmer Analyst

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I'm seeing your SD requests get bounced back. I'm looking into it.

Subject: RE: AK - NMVTIS Readiness Testing R06

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVJI	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

0.19.36 - Vehicle Use Class Code			
The utilization of the vehicle.		Source of Definition: MVA Source of Data: Accident report, registration, MVA Synonyms: Special Use, Usage Class.	
Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown
VVH/CC			
Format=Alpha-numeric Size=2 CUMF/YD6-USE/CLASS Logical Format (Type/Max Length): AN/2			

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously. I mistook that parameter as being amongst the "optional" parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I'm attempting to address the issue with owner names. Meanwhile, I'm passing the questions about following parameters on to DMV:

06/4	VVHUCC	VEHICLE USE CLASS CODE	There appears to be no way to support this parameter
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	There appears to be no non-null data nor method of obtaining a non-null value

I believe I've addressed all other issues. I'll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT
------	--------	--------------------

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Cc: Garber, Casey; Chaudhry, Amir; David Nolen, AK Dept. of Administration; Mina Peters, AK Dept. of Administration
Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME	– Will be set to REC to have brand 10
06/3	VVHBST	VEHICLE/VESSEL BODY TYPE	– From what I can tell this is supposed to map to “CP”

(Coupe)? **Yes**

Just needed additional data.

06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR	- added secondary color
06/3	VVHNLN	NUMBER OF ACTIVE LIENS	– should have previously been 0, now 1
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER	- added equipment number
30/6	VLHNAM	LIENHOLDER	- added lienholder
30/8	VLHADD	LIENHOLDER ADDRESS	- added lienholder
34/1	VOWNAM	OWNER NAME	- added additional owners

Code changes.

06/3	VVHLEI	VEHICLE LEASE INDICATOR	- fixed mapping
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	- fixed mapping
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT	- fixed mapping
26/4	VODDTE	ODOMETER DATE	- was supposed to already have been mapped to title date, system doesn't ask for / obtain this information

If you haven't already please check as to why this did not return the title date in this field.

30/7	VLNDAT	LIEN DATE	- mapped to title date, system doesn't ask for / obtain this information
------	--------	-----------	--

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3	VTIPJU	PREVIOUS TITLING JURISDICTION	The previous title was Alaska
------	--------	-------------------------------	--------------------------------------

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4	VVHUCC	VEHICLE USE CLASS CODE	This is in the online spec in Appendix D (search on use case)
------	--------	------------------------	--

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C. In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13				
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X	
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222				
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X

As for which code is the same, perhaps this diagram will help.

Non-white backgrounds indicate color-coordinated shared code, with the exception of the solid blue starting nodes.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality...but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Regards,

Mina Peters

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

To: 'Creighton, Susan' <screighton@aamva.org>; David Nolen, AK Dept. of Administration <david.nolen@alaska.gov>
Cc: Garber, Casey <CGarber@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

- 1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
- 2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
- 3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.

The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.

The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor “implementation” of the second endpoint. I will revert the previous change I made this morning to the existing NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

I received confirmation that we do not need to test the helpdesk separately.

R02B passed.

Let's move on to R03

Thanks,

Susan Creighton / 703.908.5893 office

Ok, I think we won't have to test it separately, but I'm checking to be sure. In the meantime, let's go ahead with R02B.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

It's the NMVTIS menu on the mainframe. Use PF9 from the vehicle menu.

If the help desk application is indeed separate as previously indicated, I do not have access to it.

I've reach out to David for clarification, in the meantime would it be possible to continue the readiness test for the main application?

Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

Thanks,

I've made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

The screenshot shows a web browser window with the address bar displaying `http://dmvvaicunidev1: Network Message Log`. The application has a menu bar with **Edit**, **View**, **Tools**, **Admin**, and **Help**. After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

From: Peters, Mina L (DOA)
Sent: Tuesday, May 30, 2017 8:46 AM
To: Creighton, Susan; Pressley, Dillon (DOA sponsored)
Subject: Email request

Good morning,

Since it appears we are beginning Structured testing, does anyone have a problem if we begin a new email thread with Structured testing in the name, and keep a separate thread for each scenario? Otherwise the email is exceedingly long. It will help to be able to find specific test cases historically if they are not all in one endless email chain.

Thank you,

Regards,

Mina Peters
Analyst Programmer V

Subject: Email request

Good morning,

Since it appears we are beginning Structured testing, does anyone have a problem if we begin a new email thread with Structured testing in the name, and keep a separate thread for each scenario? Otherwise the email is exceedingly long. It will help to be able to find specific test cases historically if they are not all in one endless email chain.

Thank you,

Regards,

Mina Peters

Good morning Mina,

Not a problem, I'll try to stay on top of change the subject to reflect the relevant test case.

Subject: AK NMVTIS Testing - Structured Test Case 001
Attachments: AK NMVTIS Online Structured Test Plan 20170530.xlsx

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Hello Susan,

I'm still working on executing the test case. Running into non-UNI-related validation issues. Thank you for looking that

up. Still waking up and I didn't realize we have a code that corresponded directly to Food Wagon, so I could've just searched production data. I'll let you know as soon as it's done.

Thank you,

Hi Dillon,

I found this online when I looked up Food Truck: 2013 14' Ford E450 Step Van

Please make sure you have set up the data that is highlighted yellow and gold in the scenario test cases and updated the Test Case Plan (TCP) with the data you are using. Please use the TCP I sent on Friday and then provide a copy of back to me. We need to have this completed before we start as I need that data in order to update my test tool.

Thanks,
Susan Creighton / 703.908.5893 office

Hi AK,

Attached is the testing status report and updated test case plan. We have completed as much as we can of the Readiness Testing. I'm not sure when we will have the Theft file access working, and I validated that the format is correct via your screenshot so we can move forward with the scenario testing when you are ready.

Thanks,

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- o VIN (VVHIDN) from the NT message
- o SOT (VTIJUR) from the NT message
- o Title Number (VTINUM) from the NT message
- o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- o See Appendix A for remaining NCB and MEC (02/3) block settings
- o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

This email comes from an external source, so remember, Think Before You Click!

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I'm seeing your SD requests get bounced back. I'm looking into it.

Subject: RE: AK - NMVTIS Readiness Testing R06

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVJI	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

0.19.36 - Vehicle Use Class Code			
The utilization of the vehicle.		Source of Definition: MVA Source of Data: Accident report, registration, MVA Synonyms: Special Use, Usage Class.	
Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown
VVM/CC			
Format=Alpha-numeric Size=2 CUM-YD6-USE-CLASS Logical Format (Type/Max Length): AN/2			

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.

I mistook that parameter as being amongst the "optional" parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I'm attempting to address the issue with owner names. Meanwhile, I'm passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE
parameter

There appears to be no way to support this

06/4 VVHNAX VEHICLE NUMBER OF AXLES
obtaining a non-null value

There appears to be no non-null data nor method of

I believe I've addressed all other issues. I'll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT
------	--------	--------------------

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Cc: Garber, Casey; Chaudhry, Amir; David Nolen, AK Dept. of Administration; Mina Peters, AK Dept. of Administration
Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME	– Will be set to REC to have brand 10
06/3	VVHBST	VEHICLE/VESSEL BODY TYPE	– From what I can tell this is supposed to map to “CP”

(Coupe)? **Yes**

Just needed additional data.

06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR	- added secondary color
06/3	VVHNLN	NUMBER OF ACTIVE LIENS	– should have previously been 0, now 1
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER	- added equipment number
30/6	VLHNAM	LIENHOLDER	- added lienholder
30/8	VLHADD	LIENHOLDER ADDRESS	- added lienholder
34/1	VOWNAM	OWNER NAME	- added additional owners

Code changes.

06/3	VVHLEI	VEHICLE LEASE INDICATOR	- fixed mapping
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	- fixed mapping
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT	- fixed mapping
26/4	VODDTE	ODOMETER DATE	- was supposed to already have been mapped to title date, system doesn't ask for / obtain this information

If you haven't already please check as to why this did not return the title date in this field.

30/7	VLNDAT	LIEN DATE	- mapped to title date, system doesn't ask for / obtain this information
------	--------	-----------	--

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3	VTIPJU	PREVIOUS TITLING JURISDICTION	The previous title was Alaska
------	--------	-------------------------------	--------------------------------------

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4	VVHUCC	VEHICLE USE CLASS CODE	This is in the online spec in Appendix D (search on use case)
------	--------	------------------------	--

Thank you,

Dillon Salsman-Pressley • Programmer Analyst

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBS	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C. In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk
R02A	Send a Used Vehicle Inquiry (IU) <i>all optional and required fields should be populated</i>	AICASUALCURRTC003				P
R02B	Send a Used Vehicle Inquiry (IU) <i>Inquire using VIN/SOT/and Title#</i>	ZFF70RCA2B0177029	<i>S7</i>	<i>NOMATCHTITLE</i>		P

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13				
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X	
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222				
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X

As for which code is the same, perhaps this diagram will help.

Non-white backgrounds indicate color-coordinated shared code, with the exception of the solid blue starting nodes.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality...but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey <CGarber@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

- 1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
- 2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
- 3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.

The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.

The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor “implementation” of the second endpoint. I will revert the previous change I made this morning to the existing NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

Susan Creighton / 703.908.5893 office

Ok, I think we won't have to test it separately, but I'm checking to be sure. In the meantime, let's go ahead with R02B.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

It's the NMVTIS menu on the mainframe. Use PF9 from the vehicle menu.

If the help desk application is indeed separate as previously indicated, I do not have access to it.

I've reach out to David for clarification, in the meantime would it be possible to continue the readiness test for the main application?

Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

Thanks,

I've made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

The screenshot shows a web browser window with the address bar displaying `http://dmvvaicunidev1: Network Message Log`. The application has a menu bar with **Edit**, **View**, **Tools**, **Admin**, and **Help**. The main content area is titled **Log Message** and contains a table with the following columns: **To**, **App**, **Type**, **Dev**, **ID**, **TC**, **Err**, **Source**, and **Resch Date**.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

To: 'Dillon Salsman'
Cc: Garber, Casey
Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Ok, let me check the data. I have to copy our business team on all emails so I'm adding Casey.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001
Attachments: AK NMVTIS Online Structured Test Plan 20170530.xlsx

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Please ignore the inquiries sent. They're the result of trying to get around/understand the weight validations holding me back.

Hello Susan,

I'm still working on executing the test case. Running into non-UNI-related validation issues. Thank you for looking that

up. Still waking up and I didn't realize we have a code that corresponded directly to Food Wagon, so I could've just searched production data. I'll let you know as soon as it's done.

Thank you,

Hi Dillon,

I found this online when I looked up Food Truck: 2013 14' Ford E450 Step Van

Please make sure you have set up the data that is highlighted yellow and gold in the scenario test cases and updated the Test Case Plan (TCP) with the data you are using. Please use the TCP I sent on Friday and then provide a copy of back to me. We need to have this completed before we start as I need that data in order to update my test tool.

Thanks,

Susan Creighton / 703.908.5893 office

Good morning Susan,

I'm ready to start. Could you give me an example of what a food wagon make/model would be? In the meantime I'm checking whether it matters for any make/model with code 33.

Thank you,

Hi AK,

Attached is the testing status report and updated test case plan. We have completed as much as we can of the Readiness Testing. I'm not sure when we will have the Theft file access working, and I validated that the format is correct via your screenshot so we can move forward with the scenario testing when you are ready.

Thanks,
Susan Creighton / 703.908.5893 office

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- o VIN (VVHIDN) from the NT message
- o SOT (VTIJUR) from the NT message
- o Title Number (VTINUM) from the NT message
- o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- o See Appendix A for remaining NCB and MEC (02/3) block settings
- o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVJI	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

0.19.36 - Vehicle Use Class Code			
The utilization of the vehicle.		Source of Definition: MVA Source of Data: Accident report, registration, MVA Synonyms: Special Use, Usage Class.	
Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown
VVM/CC			
Format=Alpha-numeric Size=2 CUM-YD6-USE-CLASS Logical Format (Type/Max Length): AN/2			

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Hi Dillon, thanks for the update.

Attached is the Defect Status Report that I promised I would try to have out each Friday. I am also attaching an updated Test Case Plan which denotes the test cases completed, etc. Please let me know if you have any questions.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.

I mistook that parameter as being amongst the "optional" parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I'm attempting to address the issue with owner names. Meanwhile, I'm passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE
parameter

There appears to be no way to support this

06/4 VVHNAX VEHICLE NUMBER OF AXLES
obtaining a non-null value

There appears to be no non-null data nor method of

I believe I've addressed all other issues. I'll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT
------	--------	--------------------

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME	– Will be set to REC to have brand 10
06/3	VVHBST	VEHICLE/VESSEL BODY TYPE	– From what I can tell this is supposed to map to “CP”

(Coupe)? **Yes**

Just needed additional data.

06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR	- added secondary color
06/3	VVHNLN	NUMBER OF ACTIVE LIENS	– should have previously been 0, now 1
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER	- added equipment number
30/6	VLHNAM	LIENHOLDER	- added lienholder
30/8	VLHADD	LIENHOLDER ADDRESS	- added lienholder
34/1	VOWNAM	OWNER NAME	- added additional owners

Code changes.

06/3	VVHLEI	VEHICLE LEASE INDICATOR	- fixed mapping
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	- fixed mapping
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT	- fixed mapping
26/4	VODDTE	ODOMETER DATE	- was supposed to already have been mapped to title date, system doesn't ask for / obtain this information

If you haven't already please check as to why this did not return the title date in this field.

30/7	VLNDAT	LIEN DATE	- mapped to title date, system doesn't ask for / obtain this information
------	--------	-----------	--

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3	VTIPJU	PREVIOUS TITLING JURISDICTION	The previous title was Alaska
------	--------	-------------------------------	--------------------------------------

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4	VVHUCC	VEHICLE USE CLASS CODE	This is in the online spec in Appendix D (search on use case)
------	--------	------------------------	--

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBS	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,

Subject: RE: AK - NMVTIS Readiness Testing R02A

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C. In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13				
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X	
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222				
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality...but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey <CGarber@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

- 1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
- 2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
- 3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.

The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.

The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor “implementation” of the second endpoint. I will revert the previous change I made this morning to the existing NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

I've made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

The screenshot shows a web browser window with the address bar displaying `http://dmvvaicunidev1: Network Message Log`. The application has a menu bar with **Edit**, **View**, **Tools**, **Admin**, and **Help**. Below the menu is a search bar labeled "Log Message" with a magnifying glass icon. The main content area displays a table of log messages with the following columns: **To**, **App**, **Type**, **Dev**, **ID**, **TC**, **Err**, **Source**, and **Resk Date**. The table contains 15 rows of data. The 11th row is highlighted in red, indicating it is the selected message. Below the table, there is a pagination bar showing "Page 2 of 2086 (31274 items)" and navigation links: "< Prev 1 (2) 3 4 5 6 7 ... 2093 2094 2095 Next >". On the right side of the application, there is a sidebar with several expandable sections: "Log App Message", "Message Control", "Message Control Destination", "Message Control Expected Response", "System Error Log", and "Event Log". At the bottom of the browser window, a status bar shows the message: "The Message Log page loaded successfully".

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,

Susan Creighton / 703.908.5893 office

Understood.

Here's the first page of the log which contains rest of the RI/RJ messages.

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Thanks,
Susan Creighton / 703.908.5893 office

From: Creighton, Susan
Sent: Thursday, May 11, 2017 11:20 AM
To: 'Dillon Salsman'
Cc: Garber, Casey
Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Ok, let me check the data. I have to copy our business team on all emails so I'm adding Casey.

Thanks,
Susan Creighton / 703.908.5893 office

From: Dillon Salsman [<mailto:dsalsman@resdat.com>]
Sent: Thursday, May 11, 2017 11:19 AM
To: Creighton, Susan
Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

I have sent R02A and received RB, RC, RV, and several RI/RJ messages.

From: Creighton, Susan [<mailto:screighton@aamva.org>]

Hi AK,

Attached are the minutes for today's meeting. Please let me know if I missed or misstated anything.

Please don't hesitate to let me know if you have questions.

Thanks,

Susan Creighton | Lead Systems Analyst - Quality Assurance Vehicles |AAMVA | 4401 Wilson Blvd, Ste 700, Arlington, VA 22203 | 703.908.5893 |

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Please ignore the inquiries sent. They're the result of trying to get around/understand the weight validations holding me back.

Hello Susan,

I'm still working on executing the test case. Running into non-UNI-related validation issues. Thank you for looking that up. Still waking up and I didn't realize we have a code that corresponded directly to Food Wagon, so I could've just searched production data. I'll let you know as soon as it's done.

Thank you,

Hi Dillon,

I found this online when I looked up Food Truck: 2013 14' Ford E450 Step Van

Please make sure you have set up the data that is highlighted yellow and gold in the scenario test cases and updated the Test Case Plan (TCP) with the data you are using. Please use the TCP I sent on Friday and then provide a copy of back to me. We need to have this completed before we start as I need that data in order to update my test tool.

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I'm ready to start. Could you give me an example of what a food wagon make/model would be? In the meantime I'm checking whether it matters for any make/model with code 33.

Thank you,

Hi AK,

Attached is the testing status report and updated test case plan. We have completed as much as we can of the Readiness Testing. I'm not sure when we will have the Theft file access working, and I validated that the format is correct via your screenshot so we can move forward with the scenario testing when you are ready.

Thanks,
Susan Creighton / 703.908.5893 office

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,

Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,

Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

Hi Dillon,

Yes, I can work on it this morning. I'll re-drive the NT now.

Thanks,
Susan Creighton / 703.908.5893 office

No worries, I've reverted the change.

I managed to make in a little earlier this morning. I wouldn't mind starting on the rest of the solicited cases if you're available.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- o VIN (VVHIDN) from the NT message
- o SOT (VTIJUR) from the NT message
- o Title Number (VTINUM) from the NT message
- o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- o See Appendix A for remaining NCB and MEC (02/3) block settings
- o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Hi Dillon,

R07 passed.

R11 has just 1 issue on the C3:

26/3 VTIPJU PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE

Thanks,

Susan Creighton / 703.908.5893 office

From: Dillon Salsman [<mailto:dsalsman@resdat.com>]

Subject: RE: AK - NMVTIS Readiness Testing R06

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVJI	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

0.19.36 - Vehicle Use Class Code			
The utilization of the vehicle.		Source of Definition: MVA Source of Data: Accident report, registration, MVA Synonyms: Special Use, Usage Class.	
Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown

VVH/CC
Format=Alpha-numeric Size=2 CUMF/YD6-USE/CLASS
Logical Format (Type/Max Length): AN/2

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.

I mistook that parameter as being amongst the "optional" parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I'm attempting to address the issue with owner names. Meanwhile, I'm passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE
parameter

There appears to be no way to support this

06/4 VVHNAX VEHICLE NUMBER OF AXLES
obtaining a non-null value

There appears to be no non-null data nor method of

I believe I've addressed all other issues. I'll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT
------	--------	--------------------

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME	– Will be set to REC to have brand 10
06/3	VVHBST	VEHICLE/VESSEL BODY TYPE	– From what I can tell this is supposed to map to “CP”

(Coupe)? **Yes**

Just needed additional data.

06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR	- added secondary color
06/3	VVHNLN	NUMBER OF ACTIVE LIENS	– should have previously been 0, now 1
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER	- added equipment number
30/6	VLHNAM	LIENHOLDER	- added lienholder
30/8	VLHADD	LIENHOLDER ADDRESS	- added lienholder
34/1	VOWNAM	OWNER NAME	- added additional owners

Code changes.

06/3	VVHLEI	VEHICLE LEASE INDICATOR	- fixed mapping
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	- fixed mapping
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT	- fixed mapping
26/4	VODDTE	ODOMETER DATE	- was supposed to already have been mapped to title date, system doesn't ask for / obtain this information

If you haven't already please check as to why this did not return the title date in this field.

30/7	VLNDAT	LIEN DATE	- mapped to title date, system doesn't ask for / obtain this information
------	--------	-----------	--

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3	VTIPJU	PREVIOUS TITLING JURISDICTION	The previous title was Alaska
------	--------	-------------------------------	--------------------------------------

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4	VVHUCC	VEHICLE USE CLASS CODE	This is in the online spec in Appendix D (search on use case)
------	--------	------------------------	--

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,

Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C. In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13				
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X	
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222				
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality...but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey <CGarber@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

- 1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
- 2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
- 3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.

The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.

The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

This email comes from an external source, so remember, Think Before You Click!
Ok, so for R02A did you execute from the Helpdesk or Titling?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor “implementation” of the second endpoint. I will revert the previous change I made this morning to the existing NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

Subject: RE: AK - NMVTIS Readiness Testing R03

This email comes from an external source, so remember, Think Before You Click!

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

Susan Creighton / 703.908.5893 office

I received confirmation that we do not need to test the helpdesk separately.

R02B passed.

Let's move on to R03

Thanks,

Subject: RE: AK - NMVTIS Readiness Testing

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

It's the NMVTIS menu on the mainframe. Use PF9 from the vehicle menu.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

I've made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

The screenshot displays the 'Network Message Log' interface. At the top, there is a browser address bar showing 'http://dmv.hicourtsdev1:...' and a menu bar with 'Edit', 'View', 'Tools', 'Admin', and 'Help'. Below the menu bar is a 'Log Message' section containing a table of log entries. The table has columns for 'To', 'App', 'Type', 'Dev', 'ID', 'TC', 'Err', 'Source', and 'Resp Date'. The table contains 15 rows of data, with the 10th row highlighted in red. Below the table, there is a pagination bar showing 'Page 2 of 2086 (31274 items)' and navigation links. To the right of the table is a sidebar with several options: 'Log App Message', 'Message Control', 'Message Control Destination', 'Message Control Expected Response', 'System Error Log', and 'Event Log'. At the bottom of the interface, there is a status bar that reads 'The Message Log page loaded successfully'.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Ok, let me check the data. I have to copy our business team on all emails so I'm adding Casey.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values
Attachments: AK NMVTIS Online Structured Test Plan 20170530.xlsx

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Thank you,

Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue

indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Subject: S2S GC Meeting Updates

Good morning,

I hope everyone had a nice long weekend. We have updated the S2S Governance Committee Meeting Schedule of Events to reflect a welcome dinner tomorrow, May 31, 2017 at 6:30 p.m. Dinner reservations have been made at Rustico Ballston, which is a very short walk from your hotel. The address for the restaurant is 4075 Wilson Blvd, Arlington, VA 22217 and their phone is (571) 384-1820.

If you have any problems with your travels please feel free to contact me at (703) 887-9002. Thank you and I look forward to meeting all of you on Thursday.

Region IV Conference Wraps Up

This year's Region IV Conference was held in sunny Seattle, Washington. Attendance figures were terrific with 380 attendees - near record attendance. Attendees had a great three days of informative sessions and fun networking opportunities. Agenda topics included system modernization, mDL, fraud, engaging employees, human trafficking, and much more. This year's charity auction raised almost \$9,000 with proceeds benefitting the Washington State Patrol Memorial Foundation. In the last 11 years, Region IV has raised almost \$70,000 on behalf of law enforcement charities. Sarah Garcia was sworn in as the new Region IV President, and will host the 2018 Region IV Conference in Big Sky, Montana.

AAMVA Says Goodbye to Sheila Prior, Welcomes Julie Knittle

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. Sheila has had a long and well-respected career in the AAMVA Community, starting at the Missouri Driver's License Bureau, joining the industry side for several years, and serving two tenures at AAMVA. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this [Farewell Video](#).

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

IDEC Executive Board Seeks Volunteers

OUR EVENTS

JUNE

1 | [2017 June State to State Governance Committee Meeting](#)
Arlington, Virginia

19-22 | [2017 Region II Conference](#)
Chattanooga, Tennessee

JULY

9-12 | [2017 Region I Conference](#)
Portland, Maine

AUGUST

19-20 | [Board of Director's Meeting](#)
San Francisco, California

20 | [Industry Advisory Board Meeting](#)
San Francisco, California

21-23 | [2017 Annual International Conference](#)
San Francisco, California

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

This Week's Webinars

[Understanding MEC Search Inquiry \(NR03\) National Registry System Specification](#)

May 31, 2017, 2:00 - 3:00 pm (ET)

This webinar provides an overview of the NR03 project solution, a detailed explanation of the Mini Specification for the Medical Examiner Certificate (MEC) Search Inquiry (NR03) transaction, and information regarding Mini Spec documents. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

[Resources For DMV Investigations, Part 1: Law Enforcement Programs Overview, Investigator and Fraud Integration, and the Fraud Detection & Remediation \(FDR\) Program](#)

June 1, 2017, 2:00 - 3:00 pm (ET)

This two part webinar series will provide a look into services and products offered by AAMVA for those working in all areas of DMV investigations. Attendees will hear from experts in a variety of fields to learn how AAMVA investigative related resources can be utilized and learn how to maximize their potential to enhance investigative success. This first session will share information on the strategies and resources compiled by the DMV Investigator Integration Working Group along with providing details on how these strategies and resources are being implemented. A discussion of AAMVA and the Law Enforcement Standing Committee mission and goals will provide insight into the role and responsibility DMV investigators perform within the AAMVA community. One of AAMVA's most popular fraud fighting resource, the Fraud Detection & Remediation (FDR) training program, will be detailed with a focus on how it can be utilized by those working DMV investigations. This webinar is for anyone working in and around DMV investigations including front line investigators, supervisory staff, and administrators. Attendees will benefit by attending one or both sessions and can view a previous webinar by visiting the AAMVA website.

JURISDICTION NEWS

Pennsylvania Governor Wolf Signs 'REAL ID' Bill Into Law

Pennsylvania Governor Tom Wolf signed Senate Bill 133, known as the Pennsylvania REAL ID Compliance Act (Act 3 of 2017), which will allow Pennsylvania to offer residents an optional REAL ID-compliant driver license or state identification card, which can be used to access airports, and federal facilities. Under the federal REAL ID Act, beginning January 22, 2018, residents in states that have not come into compliance with federal requirements or obtained an extension will need to show an alternative form of identification such as a passport at airports and when accessing federal buildings and military bases. PennDOT anticipates the U.S. Department of Homeland Security will continue to issue extensions to Pennsylvania until REAL ID products are available for residence. Under SB 133, no Pennsylvania resident will be required to get a REAL ID-compliant driver license or identification card, but residents who choose to do so will be able to use those forms of identification when the new federal requirements go into effect. Mark Lowe Named Director of Iowa DOT

Iowa Governor Kim Reynolds announced Interim Director of the Iowa DOT Mark Lowe will serve as the department's permanent director, effective immediately. He's served as interim director since Nov. 29, 2016. Previously, Lowe served as director of the Iowa DOT's Motor Vehicle Division and general counsel to the Iowa DOT. Lowe also served as Chair of the AAMVA International Board of Directors from 2014-2015. Before entering state government, he was a shareholder with Hopkins & Huebner, P.C. in Des Moines. Lowe has a degree in law from Drake University and a degree in community and regional planning from Iowa State University. He lives in West Des Moines with his wife, Linda. They have four children. FEDERAL NEWS

DOJ Issues Memo on Conditions of Grant Awards for Sanctuary Jurisdictions

United States Attorney General Jeff Sessions has issued a [memorandum](#) clarifying the Department of Justice's stance regarding provision of grant funding to "sanctuary cities." The memorandum states that the Department of Justice (DOJ) will require jurisdictions applying for certain Department of Justice grants to certify their compliance with federal immigration law as a condition for receiving an award. Any jurisdictions that fails to certify compliance with federal law will be ineligible to receive such awards. The certification requirement will apply to any existing grant administered by the Office of Justice Programs and the Office of Community Oriented Policing Services that expressly contains the certification condition and to future grants for which DOJ is statutorily authorized to impose such a condition. The memo also defines sanctuary jurisdiction to refer "only to jurisdictions that 'willfully refuse to comply with 8 USC 1373.'"

FMCSA Delays Entry Level Driver Training Final Rule

The Federal Motor Carrier Safety Administration (FMCSA) has [delayed](#) the effective date of its final rule regarding "Minimum Training Requirements for Entry-Level Commercial Motor Vehicles Operators." This final rule was initially effective on February 6, 2017. The action taken by FMCSA, in accordance with the Presidential directive as expressed in the memorandum of January 20, 2017 entitled "Regulatory Freeze Pending Review" temporarily delays the effective date further until June 5, 2017.

FMCSA Seeks Approval for Collection of HAZMAT Information

The Federal Motor Carrier Safety Administration (FMCSA) has requested an [extension](#) of an existing information collection request (ICR) on "Hazardous Materials Safety Permits." This ICR requires companies holding safety permits to develop communications plans that allow for the periodic tracking of the shipments. A record of the communications that includes the time of the call and location of the shipment may be kept by either the driver (e.g. recorded in a log book) or the company. These records must be kept, either physically or electronically for at least six months at the company's principal place of business or readily available to the employees at the company's principal place of business. FMCSA had previously not received comment on the notice published on November 10, 2016.

President Trump Submits Budget to Congress

President Donald Trump has submitted his fiscal year 2018 [budget proposal](#) to Congress. The budget request cites eight focus areas for reforming government and increasing economic growth: health reform; tax reform and simplification; immigration reform; reductions in federal spending; regulatory rollback; American energy development; welfare reform; and education reform. The budget submission would provide for a \$52 billion increase in spending over 2017 amounts for the Department of Defense, with offsets made by targeting reductions in other, mainly domestic spending programs. The budget request provides \$44.1

billion for the Department of Homeland Security and \$27.7 billion for the Department of Justice for law enforcement, public safety and immigration enforcement programs and activities. The budget proposal includes \$200 billion in outlays related to public/private infrastructure investment, but does not provide specifics on how that investment will ultimately achieve the goal of meeting \$1 trillion in infrastructure funding. The budget again expresses the intention to move air traffic control functions to an independent, non-governmental organization beginning in 2021, with a cap reduction in discretionary spending of \$72.8 billion. The Discretionary Overview by Major Agency is provided on page 42 of the budget.

Region IV Conference Wraps Up

This year's Region IV Conference was held in sunny Seattle, Washington. Attendance figures were terrific with 380 attendees - near record attendance. Attendees had a great three days of informative sessions and fun networking opportunities. Agenda topics included system modernization, mDL, fraud, engaging employees, human trafficking, and much more. This year's charity auction raised almost

\$9,000 with proceeds benefitting the Washington State Patrol Memorial Foundation. In the last 11 years, Region IV has raised almost \$70,000 on behalf of law enforcement charities. Sarah Garcia was sworn in as the new Region IV President, and will host the 2018 Region IV Conference in Big Sky, Montana.

AAMVA Says Goodbye to Sheila Prior, Welcomes Julie Knittle

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. Sheila has had a long and well-respected career in the AAMVA Community, starting at the Missouri Driver's License Bureau, joining the industry side for several years, and serving two tenures at AAMVA. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this [Farewell Video](#).

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

This Week's Webinars

[Understanding MEC Search Inquiry \(NR03\) National Registry System Specification](#)

May 31, 2017, 2:00 - 3:00 pm (ET)

This webinar provides an overview of the NR03 project solution, a detailed explanation of the Mini Specification for the Medical Examiner Certificate (MEC) Search Inquiry (NR03) transaction, and information regarding Mini Spec documents. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

[Resources For DMV Investigations, Part 1: Law Enforcement Programs Overview, Investigator and Fraud Integration, and the Fraud Detection & Remediation \(FDR\) Program](#)

June 1, 2017, 2:00 - 3:00 pm (ET)

This two part webinar series will provide a look into services and products offered by AAMVA for those working in all areas of DMV investigations. Attendees will hear from experts in a variety of fields to learn how AAMVA investigative related resources can be utilized and learn how to maximize their potential to enhance investigative success. This first session will share information on the strategies and resources compiled by the DMV Investigator Integration Working Group along with providing details on how these strategies and resources are being implemented. A discussion of AAMVA and the Law Enforcement Standing Committee mission and goals will provide insight into the role and responsibility DMV investigators perform within the AAMVA community. One of AAMVA's most popular fraud fighting resource, the Fraud Detection & Remediation (FDR) training program, will be detailed with a focus on how it can be utilized by those working DMV investigations. This webinar is for anyone working in and around DMV investigations including front line investigators, supervisory staff, and administrators. Attendees will benefit by attending one or both sessions and can view a previous webinar by visiting the AAMVA website.

JURISDICTION NEWS

Pennsylvania Governor Wolf Signs 'REAL ID' Bill Into Law

Pennsylvania Governor Tom Wolf signed Senate Bill 133, known as the Pennsylvania REAL ID Compliance Act (Act 3 of 2017), which will allow Pennsylvania to offer residents an optional REAL ID-compliant driver license or state identification card, which can be used to access airports, and federal facilities. Under the federal REAL ID Act, beginning January 22, 2018, residents in states that have not come into compliance with federal requirements or obtained an extension will need to show an alternative form of identification such as a passport at airports and when accessing federal buildings and military bases. PennDOT anticipates the U.S. Department of Homeland Security will continue to issue extensions to Pennsylvania until REAL ID products are available for residence. Under SB 133, no Pennsylvania resident will be required to get a REAL ID-compliant driver license or identification card, but residents who choose to do so will be able to use those forms of identification when the new federal requirements go into effect. Mark Lowe Named Director of Iowa DOT

Iowa Governor Kim Reynolds announced Interim Director of the Iowa DOT Mark Lowe will serve as the department's permanent director, effective immediately. He's served as interim director since Nov. 29, 2016. Previously, Lowe served as director of the Iowa DOT's Motor Vehicle Division and general counsel to the Iowa DOT. Lowe also served as Chair of the AAMVA International Board of Directors from 2014-2015. Before entering state government, he was a shareholder with Hopkins & Huebner, P.C. in Des Moines. Lowe has a degree in law from Drake University and a degree in community and regional planning from Iowa State University. He lives in West Des Moines with his wife, Linda. They have four children. FEDERAL NEWS

DOJ Issues Memo on Conditions of Grant Awards for Sanctuary Jurisdictions

United States Attorney General Jeff Sessions has issued a [memorandum](#) clarifying the Department of Justice's stance regarding provision of grant funding to "sanctuary cities." The memorandum states that the Department of Justice (DOJ) will require jurisdictions applying for certain Department of Justice grants to certify their compliance with federal immigration law as a condition for receiving an award. Any jurisdictions that fails to certify compliance with federal law will be ineligible to receive such awards. The certification requirement will apply to any existing grant administered by the Office of Justice Programs and the Office of Community Oriented Policing Services that expressly contains the certification condition and to future grants for which DOJ is statutorily authorized to impose such a condition. The memo also defines sanctuary jurisdiction to refer "only to jurisdictions that 'willfully refuse to comply with 8 USC 1373.'"

FMCSA Delays Entry Level Driver Training Final Rule

The Federal Motor Carrier Safety Administration (FMCSA) has [delayed](#) the effective date of its final rule regarding "Minimum Training Requirements for Entry-Level Commercial Motor Vehicles Operators." This final rule was initially effective on February 6, 2017. The action taken by FMCSA, in accordance with the Presidential directive as expressed in the memorandum of January 20, 2017 entitled "Regulatory Freeze Pending Review" temporarily delays the effective date further until June 5, 2017.

FMCSA Seeks Approval for Collection of HAZMAT Information

The Federal Motor Carrier Safety Administration (FMCSA) has requested an [extension](#) of an existing information collection request (ICR) on "Hazardous Materials Safety Permits." This ICR requires companies holding safety permits to develop communications plans that allow for the periodic tracking of the shipments. A record of the communications that includes the time of the call and location of the shipment may be kept by either the driver (e.g. recorded in a log book) or the company. These records must be kept, either physically or electronically for at least six months at the company's principal place of business or readily available to the employees at the company's principal place of business. FMCSA had previously not received comment on the notice published on November 10, 2016.

President Trump Submits Budget to Congress

President Donald Trump has submitted his fiscal year 2018 [budget proposal](#) to Congress. The budget request cites eight focus areas for reforming government and increasing economic growth: health reform; tax reform and simplification; immigration reform; reductions in federal spending; regulatory rollback; American energy development; welfare reform; and education reform. The budget submission would provide for a \$52 billion increase in spending over 2017 amounts for the Department of Defense, with offsets made by targeting reductions in other, mainly domestic spending programs. The budget request provides \$44.1

Sarah Garcia was sworn in as the new Region IV President, and will host the 2018 Region IV Conference in Big Sky, Montana.

AAMVA Says Goodbye to Sheila Prior, Welcomes Julie Knittle

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. Sheila has had a long and well-respected career in the AAMVA Community, starting at the Missouri Driver's License Bureau, joining the industry side for several years, and serving two tenures at AAMVA. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this [Farewell Video](#).

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

This Week's Webinars

[Understanding MEC Search Inquiry \(NR03\) National Registry System Specification](#)

May 31, 2017, 2:00 - 3:00 pm (ET)

This webinar provides an overview of the NR03 project solution, a detailed explanation of the Mini Specification for the Medical Examiner Certificate (MEC) Search Inquiry (NR03) transaction, and information regarding Mini Spec documents. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

[Resources For DMV Investigations, Part 1: Law Enforcement Programs Overview, Investigator and Fraud Integration, and the Fraud Detection & Remediation \(FDR\) Program](#)

June 1, 2017, 2:00 - 3:00 pm (ET)

This two part webinar series will provide a look into services and products offered by AAMVA for those working in all areas of DMV investigations. Attendees will hear from experts in a variety of fields to learn how AAMVA investigative related resources can be utilized and learn how to maximize their potential to enhance investigative success. This first session will share information on the strategies and resources compiled by the DMV Investigator Integration Working Group along with providing details on how these strategies and resources are being implemented. A discussion of AAMVA and the Law Enforcement Standing Committee mission and goals will provide insight into the role and responsibility DMV investigators perform within the AAMVA community. One of AAMVA's most popular fraud fighting resource, the Fraud Detection & Remediation (FDR) training program, will be detailed with a focus on how it can be utilized by those working DMV investigations. This webinar is for anyone working in and around DMV investigations including front line investigators, supervisory staff, and administrators. Attendees will benefit by attending one or both sessions and can view a previous webinar by visiting the AAMVA website.

JURISDICTION NEWS

Pennsylvania Governor Wolf Signs 'REAL ID' Bill Into Law

Pennsylvania Governor Tom Wolf signed Senate Bill 133, known as the Pennsylvania REAL ID Compliance Act (Act 3 of 2017), which will allow Pennsylvania to offer residents an optional REAL ID-compliant driver license or state identification card, which can be used to access airports, and federal facilities. Under the federal REAL ID Act, beginning January 22, 2018, residents in states that have not come into compliance with federal requirements or obtained an extension will need to show an alternative form of identification such as a passport at airports and when accessing federal buildings and military bases. PennDOT anticipates the U.S. Department of Homeland Security will continue to issue extensions to Pennsylvania until REAL ID products are available for residence. Under SB 133, no Pennsylvania resident will be required to get a REAL ID-compliant driver license or identification card, but residents who choose to do so will be able to use those forms of identification when the new federal requirements go into effect. Mark Lowe Named Director of Iowa DOT

Iowa Governor Kim Reynolds announced Interim Director of the Iowa DOT Mark Lowe will serve as the department's permanent director, effective immediately. He's served as interim director since Nov. 29, 2016. Previously, Lowe served as director of the Iowa DOT's Motor Vehicle Division and general counsel to the Iowa DOT. Lowe also served as Chair of the AAMVA International Board of Directors from 2014-2015. Before entering state government, he was a shareholder with Hopkins & Huebner, P.C. in Des Moines. Lowe has a degree in law from Drake University and a degree in community and regional planning from Iowa State University. He lives in West Des Moines with his wife, Linda. They have four children. FEDERAL NEWS

DOJ Issues Memo on Conditions of Grant Awards for Sanctuary Jurisdictions

United States Attorney General Jeff Sessions has issued a [memorandum](#) clarifying the Department of Justice's stance regarding provision of grant funding to "sanctuary cities." The memorandum states that the Department of Justice (DOJ) will require jurisdictions applying for certain Department of Justice grants to certify their compliance with federal immigration law as a condition for receiving an award. Any jurisdictions that fails to certify compliance with federal law will be ineligible to receive such awards. The certification requirement will apply to any existing grant administered by the Office of Justice Programs and the Office of Community Oriented Policing Services that expressly contains the certification condition and to future grants for which DOJ is statutorily authorized to impose such a condition. The memo also defines sanctuary jurisdiction to refer "only to jurisdictions that 'willfully refuse to comply with 8 USC 1373.'"

FMCSA Delays Entry Level Driver Training Final Rule

The Federal Motor Carrier Safety Administration (FMCSA) has [delayed](#) the effective date of its final rule regarding "Minimum Training Requirements for Entry-Level Commercial Motor Vehicles Operators." This final rule was initially effective on February 6, 2017. The action taken by FMCSA, in accordance with the Presidential directive as expressed in the memorandum of January 20, 2017 entitled "Regulatory Freeze Pending Review" temporarily delays the effective date further until June 5, 2017.

FMCSA Seeks Approval for Collection of HAZMAT Information

The Federal Motor Carrier Safety Administration (FMCSA) has requested an [extension](#) of an existing information collection request (ICR) on "Hazardous Materials Safety Permits." This ICR requires companies holding safety permits to develop communications plans that allow for the periodic tracking of the shipments. A record of the communications that includes the time of the call and location of the shipment may be kept by either the driver (e.g. recorded in a log book) or the company. These records must be kept, either physically or electronically for at least six months at the company's principal place of business or readily available to the employees at the company's principal place of business. FMCSA had previously not received comment on the notice published on November 10, 2016.

President Trump Submits Budget to Congress

President Donald Trump has submitted his fiscal year 2018 [budget proposal](#) to Congress. The budget request cites eight focus areas for reforming government and increasing economic growth: health reform; tax reform and simplification; immigration reform; reductions in federal spending; regulatory rollback; American energy development; welfare reform; and education reform. The budget submission would provide for a \$52 billion increase in spending over 2017 amounts for the Department of Defense, with offsets made by targeting reductions in other, mainly domestic spending programs. The budget request provides \$44.1

billion for the Department of Homeland Security and \$27.7 billion for the Department of Justice for law enforcement, public safety and immigration enforcement programs and activities. The budget proposal includes \$200 billion in outlays related to public/private infrastructure investment, but does not provide specifics on how that investment will ultimately achieve the goal of meeting \$1 trillion in infrastructure funding. The budget again expresses the intention to move air traffic control functions to an independent, non-governmental organization beginning in 2021, with a cap reduction in discretionary spending of \$72.8 billion. The Discretionary Overview by Major Agency is provided on page 42 of the budget.

This Week's Webinars

[Understanding MEC Search Inquiry \(NR03\) National Registry System Specification](#)

May 31, 2017, 2:00 - 3:00 pm (ET)

This webinar provides an overview of the NR03 project solution, a detailed explanation of the Mini Specification for the Medical Examiner Certificate (MEC) Search Inquiry (NR03) transaction, and information regarding Mini Spec documents. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

[Resources For DMV Investigations, Part 1: Law Enforcement Programs Overview, Investigator and Fraud Integration, and the Fraud Detection & Remediation \(FDR\) Program](#)

June 1, 2017, 2:00 - 3:00 pm (ET)

This two part webinar series will provide a look into services and products offered by AAMVA for those working in all areas of DMV investigations. Attendees will hear from experts in a variety of fields to learn how AAMVA investigative related resources can be utilized and learn how to maximize their potential to enhance investigative success. This first session will share information on the strategies and resources compiled by the DMV Investigator Integration Working Group along with providing details on how these strategies and resources are being implemented. A discussion of AAMVA and the Law Enforcement Standing Committee mission and goals will provide insight into the role and responsibility DMV investigators perform within the AAMVA community. One of AAMVA's most popular fraud fighting resource, the Fraud Detection & Remediation (FDR) training program, will be detailed with a focus on how it can be utilized by those working DMV investigations. This webinar is for anyone working in and around DMV investigations including front line investigators, supervisory staff, and administrators. Attendees will benefit by attending one or both sessions and can view a previous webinar by visiting the AAMVA website.

JURISDICTION NEWS

Pennsylvania Governor Wolf Signs 'REAL ID' Bill Into Law

Pennsylvania Governor Tom Wolf signed Senate Bill 133, known as the Pennsylvania REAL ID Compliance Act (Act 3 of 2017), which will allow Pennsylvania to offer residents an optional REAL ID-compliant driver license or state identification card, which can be used to access airports, and federal facilities. Under the federal REAL ID Act, beginning January 22, 2018, residents in states that have not come into compliance with federal requirements or obtained an extension will need to show an alternative form of identification such as a passport at airports and when accessing federal buildings and military bases. PennDOT anticipates the U.S. Department of Homeland Security will continue to issue extensions to Pennsylvania until REAL ID products are available for residence. Under SB 133, no Pennsylvania resident will be required to get a REAL ID-compliant driver license or identification card, but residents who choose to do so will be able to use those forms of identification when the new federal requirements go into effect. Mark Lowe Named Director of Iowa DOT

Iowa Governor Kim Reynolds announced Interim Director of the Iowa DOT Mark Lowe will serve as the department's permanent director, effective immediately. He's served as interim director since Nov. 29, 2016. Previously, Lowe served as director of the Iowa DOT's Motor Vehicle Division and general counsel to the Iowa DOT. Lowe also served as Chair of the AAMVA International Board of Directors from 2014-2015. Before entering state government, he was a shareholder with Hopkins & Huebner, P.C. in Des Moines. Lowe has a degree in law from Drake University and a degree in community and regional planning from Iowa State University. He lives in West Des Moines with his wife, Linda. They have four children. FEDERAL NEWS

DOJ Issues Memo on Conditions of Grant Awards for Sanctuary Jurisdictions

United States Attorney General Jeff Sessions has issued a [memorandum](#) clarifying the Department of Justice's stance regarding provision of grant funding to "sanctuary cities." The memorandum states that the Department of Justice (DOJ) will require jurisdictions applying for certain Department of Justice grants to certify their compliance with federal immigration law as a condition for receiving an award. Any jurisdictions that fails to certify compliance with federal law will be ineligible to receive such awards. The certification requirement will apply to any existing grant administered by the Office of Justice Programs and the Office of Community Oriented Policing Services that expressly contains the certification condition and to future grants for which DOJ is statutorily authorized to impose such a condition. The memo also defines sanctuary jurisdiction to refer "only to jurisdictions that 'willfully refuse to comply with 8 USC 1373.'"

FMCSA Delays Entry Level Driver Training Final Rule

The Federal Motor Carrier Safety Administration (FMCSA) has [delayed](#) the effective date of its final rule regarding "Minimum Training Requirements for Entry-Level Commercial Motor Vehicles Operators." This final rule was initially effective on February 6, 2017. The action taken by FMCSA, in accordance with the Presidential directive as expressed in the memorandum of January 20, 2017 entitled "Regulatory Freeze Pending Review" temporarily delays the effective date further until June 5, 2017.

FMCSA Seeks Approval for Collection of HAZMAT Information

The Federal Motor Carrier Safety Administration (FMCSA) has requested an [extension](#) of an existing information collection request (ICR) on "Hazardous Materials Safety Permits." This ICR requires companies holding safety permits to develop communications plans that allow for the periodic tracking of the shipments. A record of the communications that includes the time of the call and location of the shipment may be kept by either the driver (e.g. recorded in a log book) or the company. These records must be kept, either physically or electronically for at least six months at the company's principal place of business or readily available to the employees at the company's principal place of business. FMCSA had previously not received comment on the notice published on November 10, 2016.

President Trump Submits Budget to Congress

President Donald Trump has submitted his fiscal year 2018 [budget proposal](#) to Congress. The budget request cites eight focus areas for reforming government and increasing economic growth: health reform; tax reform and simplification; immigration reform; reductions in federal spending; regulatory rollback; American energy development; welfare reform; and education reform. The budget submission would provide for a \$52 billion increase in spending over 2017 amounts for the Department of Defense, with offsets made by targeting reductions in other, mainly domestic spending programs. The budget request provides \$44.1

billion for the Department of Homeland Security and \$27.7 billion for the Department of Justice for law enforcement, public safety and immigration enforcement programs and activities. The budget proposal includes \$200 billion in outlays related to public/private infrastructure investment, but does not provide specifics on how that investment will ultimately achieve the goal of meeting \$1 trillion in infrastructure funding. The budget again expresses the intention to move air traffic control functions to an independent, non-governmental organization beginning in 2021, with a cap reduction in discretionary spending of \$72.8 billion. The Discretionary Overview by Major Agency is provided on page 42 of the budget.

Region IV Conference Wraps Up

This year's Region IV Conference was held in sunny Seattle, Washington. Attendance figures were terrific with 380 attendees - near record attendance. Attendees had a great three days of informative sessions and fun networking opportunities. Agenda topics included system modernization, mDL, fraud, engaging employees, human trafficking, and much more. This year's charity auction raised almost \$9,000 with proceeds benefitting the Washington State Patrol Memorial Foundation. In the last 11 years, Region IV has raised almost \$70,000 on behalf of law enforcement charities. Sarah Garcia was sworn in as the new Region IV President, and will host the 2018 Region IV Conference in Big Sky, Montana.

AAMVA Says Goodbye to Sheila Prior, Welcomes Julie Knittle

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. Sheila has had a long and well-respected career in the AAMVA Community, starting at the Missouri Driver's License Bureau, joining the industry side for several years, and serving two tenures at AAMVA. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this [Farewell Video](#).

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

Pennsylvania Governor Wolf Signs 'REAL ID' Bill Into Law

Pennsylvania Governor Tom Wolf signed Senate Bill 133, known as the Pennsylvania REAL ID Compliance Act (Act 3 of 2017), which will allow Pennsylvania to offer residents an optional REAL ID-compliant driver license or state identification card, which can be used to access airports, and federal facilities. Under the federal REAL ID Act, beginning January 22, 2018, residents in states that have not come into compliance with federal requirements or obtained an extension will need to show an alternative form of identification such as a passport at airports and when accessing federal buildings and military bases. PennDOT anticipates the U.S. Department of Homeland Security will continue to issue extensions to Pennsylvania until REAL ID products are available for residence. Under SB 133, no Pennsylvania resident will be required to get a REAL ID-compliant driver license or identification card, but residents who choose to do so will be able to use those forms of identification when the new federal requirements go into effect. Mark Lowe Named Director of Iowa DOT

Iowa Governor Kim Reynolds announced Interim Director of the Iowa DOT Mark Lowe will serve as the department's permanent director, effective immediately. He's served as interim director since Nov. 29, 2016. Previously, Lowe served as director of the Iowa DOT's Motor Vehicle Division and general counsel to the Iowa DOT. Lowe also served as Chair of the AAMVA International Board of Directors from 2014-2015. Before entering state government, he was a shareholder with Hopkins & Huebner, P.C. in Des Moines. Lowe has a degree in law from Drake University and a degree in community and regional planning from Iowa State University. He lives in West Des Moines with his wife, Linda. They have four children. FEDERAL NEWS

DOJ Issues Memo on Conditions of Grant Awards for Sanctuary Jurisdictions

United States Attorney General Jeff Sessions has issued a [memorandum](#) clarifying the Department of Justice's stance regarding provision of grant funding to "sanctuary cities." The memorandum states that the Department of Justice (DOJ) will require jurisdictions applying for certain Department of Justice grants to certify their compliance with federal immigration law as a condition for receiving an award. Any jurisdictions that fails to certify compliance with federal law will be ineligible to receive such awards. The certification requirement will apply to any existing grant administered by the Office of Justice Programs and the Office of Community Oriented Policing Services that expressly contains the certification condition and to future grants for which DOJ is statutorily authorized to impose such a condition. The memo also defines sanctuary jurisdiction to refer "only to jurisdictions that 'willfully refuse to comply with 8 USC 1373.'"

FMCSA Delays Entry Level Driver Training Final Rule

The Federal Motor Carrier Safety Administration (FMCSA) has [delayed](#) the effective date of its final rule regarding "Minimum Training Requirements for Entry-Level Commercial Motor Vehicles Operators." This final rule was initially effective on February 6, 2017. The action taken by FMCSA, in accordance with the Presidential directive as expressed in the memorandum of January 20, 2017 entitled "Regulatory Freeze Pending Review" temporarily delays the effective date further until June 5, 2017.

FMCSA Seeks Approval for Collection of HAZMAT Information

The Federal Motor Carrier Safety Administration (FMCSA) has requested an [extension](#) of an existing information collection request (ICR) on "Hazardous Materials Safety Permits." This ICR requires companies holding safety permits to develop communications plans that allow for the periodic tracking of the shipments. A record of the communications that includes the time of the call and location of the shipment may be kept by either the driver (e.g. recorded in a log book) or the company. These records must be kept, either physically or electronically for at least six months at the company's principal place of business or readily available to the employees at the company's principal place of business. FMCSA had previously not received comment on the notice published on November 10, 2016.

President Trump Submits Budget to Congress

President Donald Trump has submitted his fiscal year 2018 [budget proposal](#) to Congress. The budget request cites eight focus areas for reforming government and increasing economic growth: health reform; tax reform and simplification; immigration reform; reductions in federal spending; regulatory rollback; American energy development; welfare reform; and education reform. The budget submission would provide for a \$52 billion increase in spending over 2017 amounts for the Department of Defense, with offsets made by targeting reductions in other, mainly domestic spending programs. The budget request provides \$44.1

billion for the Department of Homeland Security and \$27.7 billion for the Department of Justice for law enforcement, public safety and immigration enforcement programs and activities. The budget proposal includes \$200 billion in outlays related to public/private infrastructure investment, but does not provide specifics on how that investment will ultimately achieve the goal of meeting \$1 trillion in infrastructure funding. The budget again expresses the intention to move air traffic control functions to an independent, non-governmental organization beginning in 2021, with a cap reduction in discretionary spending of \$72.8 billion. The Discretionary Overview by Major Agency is provided on page 42 of the budget.

Region IV Conference Wraps Up

This year's Region IV Conference was held in sunny Seattle, Washington. Attendance figures were terrific with 380 attendees - near record attendance. Attendees had a great three days of informative sessions and fun networking opportunities. Agenda topics included system modernization, mDL, fraud, engaging employees, human trafficking, and much more. This year's charity auction raised almost \$9,000 with proceeds benefitting the Washington State Patrol Memorial Foundation. In the last 11 years, Region IV has raised almost \$70,000 on behalf of law enforcement charities. Sarah Garcia was sworn in as the new Region IV President, and will host the 2018 Region IV Conference in Big Sky, Montana.

AAMVA Says Goodbye to Sheila Prior, Welcomes Julie Knittle

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. Sheila has had a long and well-respected career in the AAMVA Community, starting at the Missouri Driver's License Bureau, joining the industry side for several years, and serving two tenures at AAMVA. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this [Farewell Video](#).

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

This Week's Webinars

[Understanding MEC Search Inquiry \(NR03\) National Registry System Specification](#)

May 31, 2017, 2:00 - 3:00 pm (ET)

This webinar provides an overview of the NR03 project solution, a detailed explanation of the Mini Specification for the Medical Examiner Certificate (MEC) Search Inquiry (NR03) transaction, and information regarding Mini Spec documents. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

[Resources For DMV Investigations, Part 1: Law Enforcement Programs Overview, Investigator and Fraud Integration, and the Fraud Detection & Remediation \(FDR\) Program](#)

June 1, 2017, 2:00 - 3:00 pm (ET)

This two part webinar series will provide a look into services and products offered by AAMVA for those working in all areas of DMV investigations. Attendees will hear from experts in a variety of fields to learn how AAMVA investigative related resources can be utilized and learn how to maximize their potential to enhance investigative success. This first session will share information on the strategies and resources compiled by the DMV Investigator Integration Working Group along with providing details on how these strategies and resources are being implemented. A discussion of AAMVA and the Law Enforcement Standing Committee mission and goals will provide insight into the role and responsibility DMV investigators perform within the AAMVA community. One of AAMVA's most popular fraud fighting resource, the Fraud Detection & Remediation (FDR) training program, will be detailed with a focus on how it can be utilized by those working DMV investigations. This webinar is for anyone working in and around DMV investigations including front line investigators, supervisory staff, and administrators. Attendees will benefit by attending one or both sessions and can view a previous webinar by visiting the AAMVA website.

DOJ Issues Memo on Conditions of Grant Awards for Sanctuary Jurisdictions

United States Attorney General Jeff Sessions has issued a [memorandum](#) clarifying the Department of Justice's stance regarding provision of grant funding to "sanctuary cities." The memorandum states that the Department of Justice (DOJ) will require jurisdictions applying for certain Department of Justice grants to certify their compliance with federal immigration law as a condition for receiving an award. Any jurisdictions that fails to certify compliance with federal law will be ineligible to receive such awards. The certification requirement will apply to any existing grant administered by the Office of Justice Programs and the Office of Community Oriented Policing Services that expressly contains the certification condition and to future grants for which DOJ is statutorily authorized to impose such a condition. The memo also defines sanctuary jurisdiction to refer "only to jurisdictions that 'willfully refuse to comply with 8 USC 1373.'"

FMCSA Delays Entry Level Driver Training Final Rule

The Federal Motor Carrier Safety Administration (FMCSA) has [delayed](#) the effective date of its final rule regarding "Minimum Training Requirements for Entry-Level Commercial Motor Vehicles Operators." This final rule was initially effective on February 6, 2017. The action taken by FMCSA, in accordance with the Presidential directive as expressed in the memorandum of January 20, 2017 entitled "Regulatory Freeze Pending Review" temporarily delays the effective date further until June 5, 2017.

FMCSA Seeks Approval for Collection of HAZMAT Information

The Federal Motor Carrier Safety Administration (FMCSA) has requested an [extension](#) of an existing information collection request (ICR) on "Hazardous Materials Safety Permits." This ICR requires companies holding safety permits to develop communications plans that allow for the periodic tracking of the shipments. A record of the communications that includes the time of the call and location of the shipment may be kept by either the driver (e.g. recorded in a log book) or the company. These records must be kept, either physically or electronically for at least six months at the company's principal place of business or readily available to the employees at the company's principal place of business. FMCSA had previously not received comment on the notice published on November 10, 2016.

President Trump Submits Budget to Congress

President Donald Trump has submitted his fiscal year 2018 [budget proposal](#) to Congress. The budget request cites eight focus areas for reforming government and increasing economic growth: health reform; tax reform and simplification; immigration reform; reductions in federal spending; regulatory rollback; American energy development; welfare reform; and education reform. The budget submission would provide for a \$52 billion increase in spending over 2017 amounts for the Department of Defense, with offsets made by targeting reductions in other, mainly domestic spending programs. The budget request provides \$44.1

billion for the Department of Homeland Security and \$27.7 billion for the Department of Justice for law enforcement, public safety and immigration enforcement programs and activities. The budget proposal includes \$200 billion in outlays related to public/private infrastructure investment, but does not provide specifics on how that investment will ultimately achieve the goal of meeting \$1 trillion in infrastructure funding. The budget again expresses the intention to move air traffic control functions to an independent, non-governmental organization beginning in 2021, with a cap reduction in discretionary spending of \$72.8 billion. The Discretionary Overview by Major Agency is provided on page 42 of the budget.

Region IV Conference Wraps Up

This year's Region IV Conference was held in sunny Seattle, Washington. Attendance figures were terrific with 380 attendees - near record attendance. Attendees had a great three days of informative sessions and fun networking opportunities. Agenda topics included system modernization, mDL, fraud, engaging employees, human trafficking, and much more. This year's charity auction raised almost \$9,000 with proceeds benefitting the Washington State Patrol Memorial Foundation. In the last 11 years, Region IV has raised almost \$70,000 on behalf of law enforcement charities. Sarah Garcia was sworn in as the new Region IV President, and will host the 2018 Region IV Conference in Big Sky, Montana.

AAMVA Says Goodbye to Sheila Prior, Welcomes Julie Knittle

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. Sheila has had a long and well-respected career in the AAMVA Community, starting at the Missouri Driver's License Bureau, joining the industry side for several years, and serving two tenures at AAMVA. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this [Farewell Video](#).

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

This Week's Webinars

[Understanding MEC Search Inquiry \(NR03\) National Registry System Specification](#)

May 31, 2017, 2:00 - 3:00 pm (ET)

This webinar provides an overview of the NR03 project solution, a detailed explanation of the Mini Specification for the Medical Examiner Certificate (MEC) Search Inquiry (NR03) transaction, and information regarding Mini Spec documents. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

[Resources For DMV Investigations, Part 1: Law Enforcement Programs Overview, Investigator and Fraud Integration, and the Fraud Detection & Remediation \(FDR\) Program](#)

June 1, 2017, 2:00 - 3:00 pm (ET)

This two part webinar series will provide a look into services and products offered by AAMVA for those working in all areas of DMV investigations. Attendees will hear from experts in a variety of fields to learn how AAMVA investigative related resources can be utilized and learn how to maximize their potential to enhance investigative success. This first session will share information on the strategies and resources compiled by the DMV Investigator Integration Working Group along with providing details on how these strategies and resources are being implemented. A discussion of AAMVA and the Law Enforcement Standing Committee mission and goals will provide insight into the role and responsibility DMV investigators perform within the AAMVA community. One of AAMVA's most popular fraud fighting resource, the Fraud Detection & Remediation (FDR) training program, will be detailed with a focus on how it can be utilized by those working DMV investigations. This webinar is for anyone working in and around DMV investigations including front line investigators, supervisory staff, and administrators. Attendees will benefit by attending one or both sessions and can view a previous webinar by visiting the AAMVA website.

JURISDICTION NEWS

Pennsylvania Governor Wolf Signs 'REAL ID' Bill Into Law

Pennsylvania Governor Tom Wolf signed Senate Bill 133, known as the Pennsylvania REAL ID Compliance Act (Act 3 of 2017), which will allow Pennsylvania to offer residents an optional REAL ID-compliant driver license or state identification card, which can be used to access airports, and federal facilities. Under the federal REAL ID Act, beginning January 22, 2018, residents in states that have not come into compliance with federal requirements or obtained an extension will need to show an alternative form of identification such as a passport at airports and when accessing federal buildings and military bases. PennDOT anticipates the U.S. Department of Homeland Security will continue to issue extensions to Pennsylvania until REAL ID products are available for residence. Under SB 133, no Pennsylvania resident will be required to get a REAL ID-compliant driver license or identification card, but residents who choose to do so will be able to use those forms of identification when the new federal requirements go into effect. billion for the Department of Homeland Security and \$27.7 billion for the Department of Justice for law enforcement, public safety and immigration enforcement programs and activities. The budget proposal includes \$200 billion in outlays related to public/private infrastructure investment, but does not provide specifics on how that investment will ultimately achieve the goal of meeting \$1 trillion in infrastructure funding. The budget again expresses the intention to move air traffic control functions to an independent, non-governmental organization beginning in 2021, with a cap reduction in discretionary spending of \$72.8 billion. The Discretionary Overview by Major Agency is provided on page 42 of the budget.

Region IV Conference Wraps Up

This year's Region IV Conference was held in sunny Seattle, Washington. Attendance figures were terrific with 380 attendees - near record attendance. Attendees had a great three days of informative sessions and fun networking opportunities. Agenda topics included system modernization, mDL, fraud, engaging employees, human trafficking, and much more. This year's charity auction raised almost

\$9,000 with proceeds benefitting the Washington State Patrol Memorial Foundation. In the last 11 years, Region IV has raised almost \$70,000 on behalf of law enforcement charities. Sarah Garcia was sworn in as the new Region IV President, and will host the 2018 Region IV Conference in Big Sky, Montana.

AAMVA Says Goodbye to Sheila Prior, Welcomes Julie Knittle

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. Sheila has had a long and well-respected career in the AAMVA Community, starting at the Missouri Driver's License Bureau, joining the industry side for several years, and serving two tenures at AAMVA. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this [Farewell Video](#).

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

IDEC Executive Board Seeks Volunteers

This Week's Webinars

[Understanding MEC Search Inquiry \(NR03\) National Registry System Specification](#)

May 31, 2017, 2:00 - 3:00 pm (ET)

This webinar provides an overview of the NR03 project solution, a detailed explanation of the Mini Specification for the Medical Examiner Certificate (MEC) Search Inquiry (NR03) transaction, and information regarding Mini Spec documents. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

[Resources For DMV Investigations, Part 1: Law Enforcement Programs Overview, Investigator and Fraud Integration, and the Fraud Detection & Remediation \(FDR\) Program](#)

June 1, 2017, 2:00 - 3:00 pm (ET)

This two part webinar series will provide a look into services and products offered by AAMVA for those working in all areas of DMV investigations. Attendees will hear from experts in a variety of fields to learn how AAMVA investigative related resources can be utilized and learn how to maximize their potential to enhance investigative success. This first session will share information on the strategies and resources compiled by the DMV Investigator Integration Working Group along with providing details on how these strategies and resources are being implemented. A discussion of AAMVA and the Law Enforcement Standing Committee mission and goals will provide insight into the role and responsibility DMV investigators perform within the AAMVA community. One of AAMVA's most popular fraud fighting resource, the Fraud Detection & Remediation (FDR) training program, will be detailed with a focus on how it can be utilized by those working DMV investigations. This webinar is for anyone working in and around DMV investigations including front line investigators, supervisory staff, and administrators. Attendees will benefit by attending one or both sessions and can view a previous webinar by visiting the AAMVA website.

JURISDICTION NEWS

Pennsylvania Governor Wolf Signs 'REAL ID' Bill Into Law

Pennsylvania Governor Tom Wolf signed Senate Bill 133, known as the Pennsylvania REAL ID Compliance Act (Act 3 of 2017), which will allow Pennsylvania to offer residents an optional REAL ID-compliant driver license or state identification card, which can be used to access airports, and federal facilities. Under the federal REAL ID Act, beginning January 22, 2018, residents in states that have not come into compliance with federal requirements or obtained an extension will need to show an alternative form of identification such as a passport at airports and when accessing federal buildings and military bases. PennDOT anticipates the U.S. Department of Homeland Security will continue to issue extensions to Pennsylvania until REAL ID products are available for residence. Under SB 133, no Pennsylvania resident will be required to get a REAL ID-compliant driver license or identification card, but residents who choose to do so will be able to use those forms of identification when the new federal requirements go into effect. Mark Lowe Named Director of Iowa DOT

Iowa Governor Kim Reynolds announced Interim Director of the Iowa DOT Mark Lowe will serve as the department's permanent director, effective immediately. He's served as interim director since Nov. 29, 2016. Previously, Lowe served as director of the Iowa DOT's Motor Vehicle Division and general counsel to the Iowa DOT. Lowe also served as Chair of the AAMVA International Board of Directors from 2014-2015. Before entering state government, he was a shareholder with Hopkins & Huebner, P.C. in Des Moines. Lowe has a degree in law from Drake University and a degree in community and regional planning from Iowa State University. He lives in West Des Moines with his wife, Linda. They have four children. [Read more here.](#)

FEDERAL NEWS

DOJ Issues Memo on Conditions of Grant Awards for Sanctuary Jurisdictions

United States Attorney General Jeff Sessions has issued a [memorandum](#) clarifying the Department of Justice's stance regarding provision of grant funding to "sanctuary cities." The memorandum states that the Department of Justice (DOJ) will require jurisdictions applying for certain Department of Justice grants to certify their compliance with federal immigration law as a condition for receiving an award. Any jurisdictions that fails to certify compliance with federal law will be ineligible to receive such awards. The certification requirement will apply to any existing grant administered by the Office of Justice Programs and the Office of Community Oriented Policing Services that expressly contains the certification condition and to future grants for which DOJ is statutorily authorized to impose such a condition. The memo also defines sanctuary jurisdiction to refer "only to jurisdictions that 'willfully refuse to comply with 8 USC 1373.'"

FMCSA Delays Entry Level Driver Training Final Rule

The Federal Motor Carrier Safety Administration (FMCSA) has [delayed](#) the effective date of its final rule regarding "Minimum Training Requirements for Entry-Level Commercial Motor Vehicles Operators." This final rule was initially effective on February 6, 2017. The action taken by FMCSA, in accordance with the Presidential directive as expressed in the memorandum of January 20, 2017 entitled "Regulatory Freeze Pending Review" temporarily delays the effective date further until June 5, 2017.

FMCSA Seeks Approval for Collection of HAZMAT Information

The Federal Motor Carrier Safety Administration (FMCSA) has requested an [extension](#) of an existing information collection request (ICR) on "Hazardous Materials Safety Permits." This ICR requires companies holding safety permits to develop communications plans that allow for the periodic tracking of the shipments. A record of the communications that includes the time of the call and location of the shipment may be kept by either the driver (e.g. recorded in a log book) or the company. These records must be kept, either physically or electronically for at least six months at the company's principal place of business or readily available to the employees at the company's principal place of business. FMCSA had previously not received comment on the notice published on November 10, 2016.

President Trump Submits Budget to Congress

President Donald Trump has submitted his fiscal year 2018 [budget proposal](#) to Congress. The budget request cites eight focus areas for reforming government and increasing economic growth: health reform; tax reform and simplification; immigration reform; reductions in federal spending; regulatory rollback; American energy development; welfare reform; and education reform. The budget submission would provide for a \$52 billion increase in spending over 2017 amounts for the Department of Defense, with offsets made by targeting reductions in other, mainly domestic spending programs. The budget request provides \$44.1

TRB's National Cooperative Highway Research Program (NCHRP) has released a brochure that summarizes its research in the field of connected and automated vehicle. This resource explores how TRB is coordinating research to explore the legal, societal, operational, and other impacts that connected and automated vehicle technology may have on transportation agencies and the traveling public. The brochure explores how TRB is administering projects, issuing reports, and convening top-level leaders to address these emerging issues. [Read more here.](#)

Region IV Conference Wraps Up

This year's Region IV Conference was held in sunny Seattle, Washington. Attendance figures were terrific with 380 attendees - near record attendance. Attendees had a great three days of informative sessions and fun networking opportunities. Agenda topics included system modernization, mDL, fraud, engaging employees, human trafficking, and much more. This year's charity auction raised almost \$9,000 with proceeds benefitting the Washington State Patrol Memorial Foundation. In the last 11 years, Region IV has raised almost \$70,000 on behalf of law enforcement charities. Sarah Garcia was sworn in as the new Region IV President, and will host the 2018 Region IV Conference in Big Sky, Montana.

AAMVA Says Goodbye to Sheila Prior, Welcomes Julie Knittle

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. Sheila has had a long and well-respected career in the AAMVA Community, starting at the Missouri Driver's License Bureau, joining the industry side for several years, and serving two tenures at AAMVA. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this [Farewell Video](#).

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

This Week's Webinars

[Understanding MEC Search Inquiry \(NR03\) National Registry System Specification](#)

May 31, 2017, 2:00 - 3:00 pm (ET)

This webinar provides an overview of the NR03 project solution, a detailed explanation of the Mini Specification for the Medical Examiner Certificate (MEC) Search Inquiry (NR03) transaction, and information regarding Mini Spec documents. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

[Resources For DMV Investigations, Part 1: Law Enforcement Programs Overview, Investigator and Fraud Integration, and the Fraud Detection & Remediation \(FDR\) Program](#)

June 1, 2017, 2:00 - 3:00 pm (ET)

This two part webinar series will provide a look into services and products offered by AAMVA for those working in all areas of DMV investigations. Attendees will hear from experts in a variety of fields to learn how AAMVA investigative related resources can be utilized and learn how to maximize their potential to enhance investigative success. This first session will share information on the strategies and resources compiled by the DMV Investigator Integration Working Group along with providing details on how these strategies and resources are being implemented. A discussion of AAMVA and the Law Enforcement Standing Committee mission and goals will provide insight into the role and responsibility DMV investigators perform within the AAMVA community. One of AAMVA's most popular fraud fighting resource, the Fraud Detection & Remediation (FDR) training program, will be detailed with a focus on how it can be utilized by those working DMV investigations. This webinar is for anyone working in and around DMV investigations including front line investigators, supervisory staff, and administrators. Attendees will benefit by attending one or both sessions and can view a previous webinar by visiting the AAMVA website.

JURISDICTION NEWS

Pennsylvania Governor Wolf Signs 'REAL ID' Bill Into Law

Pennsylvania Governor Tom Wolf signed Senate Bill 133, known as the Pennsylvania REAL ID Compliance Act (Act 3 of 2017), which will allow Pennsylvania to offer residents an optional REAL ID-compliant driver license or state identification card, which can be used to access airports, and federal facilities. Under the federal REAL ID Act, beginning January 22, 2018, residents in states that have not come into compliance with federal requirements or obtained an extension will need to show an alternative form of identification such as a passport at airports and when accessing federal buildings and military bases. PennDOT anticipates the U.S. Department of Homeland Security will continue to issue extensions to Pennsylvania until REAL ID products are available for residence. Under SB 133, no Pennsylvania resident will be required to get a REAL ID-compliant driver license or identification card, but residents who choose to do so will be able to use those forms of identification when the new federal requirements go into effect. Mark Lowe Named Director of Iowa DOT

Iowa Governor Kim Reynolds announced Interim Director of the Iowa DOT Mark Lowe will serve as the department's permanent director, effective immediately. He's served as interim director since Nov. 29, 2016. Previously, Lowe served as director of the Iowa DOT's Motor Vehicle Division and general counsel to the Iowa DOT. Lowe also served as Chair of the AAMVA International Board of Directors from 2014-2015. Before entering state government, he was a shareholder with Hopkins & Huebner, P.C. in Des Moines. Lowe has a degree in law from Drake University and a degree in community and regional planning from Iowa State University. He lives in West Des Moines with his wife, Linda. They have four children. [Read more here.](#)

FEDERAL NEWS

DOJ Issues Memo on Conditions of Grant Awards for Sanctuary Jurisdictions

United States Attorney General Jeff Sessions has issued a [memorandum](#) clarifying the Department of Justice's stance regarding provision of grant funding to "sanctuary cities." The memorandum states that the Department of Justice (DOJ) will require jurisdictions applying for certain Department of Justice grants to certify their compliance with federal immigration law as a condition for receiving an award. Any jurisdictions that fails to certify compliance with federal law will be ineligible to receive such awards. The certification requirement will apply to any existing grant administered by the Office of Justice Programs and the Office of Community Oriented Policing Services that expressly contains the certification condition and to future grants for which DOJ is statutorily authorized to impose such a condition. The memo also defines sanctuary jurisdiction to refer "only to jurisdictions that 'willfully refuse to comply with 8 USC 1373.'"

FMCSA Delays Entry Level Driver Training Final Rule

The Federal Motor Carrier Safety Administration (FMCSA) has [delayed](#) the effective date of its final rule regarding "Minimum Training Requirements for Entry-Level Commercial Motor Vehicles Operators." This final rule was initially effective on February 6, 2017. The action taken by FMCSA, in accordance with the Presidential directive as expressed in the memorandum of January 20, 2017 entitled "Regulatory Freeze Pending Review" temporarily delays the effective date further until June 5, 2017.

FMCSA Seeks Approval for Collection of HAZMAT Information

The Federal Motor Carrier Safety Administration (FMCSA) has requested an [extension](#) of an existing information collection request (ICR) on "Hazardous Materials Safety Permits." This ICR requires companies holding safety permits to develop communications plans that allow for the periodic tracking of the shipments. A record of the communications that includes the time of the call and location of the shipment may be kept by either the driver (e.g. recorded in a log book) or the company. These records must be kept, either physically or electronically for at least six months at the company's principal place of business or readily available to the employees at the company's principal place of business. FMCSA had previously not received comment on the notice published on November 10, 2016.

President Trump Submits Budget to Congress

President Donald Trump has submitted his fiscal year 2018 [budget proposal](#) to Congress. The budget request cites eight focus areas for reforming government and increasing economic growth: health reform; tax reform and simplification; immigration reform; reductions in federal spending; regulatory rollback; American energy development; welfare reform; and education reform. The budget submission would provide for a \$52 billion increase in spending over 2017 amounts for the Department of Defense, with offsets made by targeting reductions in other, mainly domestic spending programs. The budget request provides \$44.1

Region IV Conference Wraps Up

This year's Region IV Conference was held in sunny Seattle, Washington. Attendance figures were terrific with 380 attendees - near record attendance. Attendees had a great three days of informative sessions and fun networking opportunities. Agenda topics included system modernization, mDL, fraud, engaging employees, human trafficking, and much more. This year's charity auction raised almost

\$9,000 with proceeds benefitting the Washington State Patrol Memorial Foundation. In the last 11 years, Region IV has raised almost \$70,000 on behalf of law enforcement charities. Sarah Garcia was sworn in as the new Region IV President, and will host the 2018 Region IV Conference in Big Sky, Montana.

AAMVA Says Goodbye to Sheila Prior, Welcomes Julie Knittle

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. Sheila has had a long and well-respected career in the AAMVA Community, starting at the Missouri Driver's License Bureau, joining the industry side for several years, and serving two tenures at AAMVA. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this [Farewell Video](#).

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

This Week's Webinars

[Understanding MEC Search Inquiry \(NR03\) National Registry System Specification](#)

May 31, 2017, 2:00 - 3:00 pm (ET)

This webinar provides an overview of the NR03 project solution, a detailed explanation of the Mini Specification for the Medical Examiner Certificate (MEC) Search Inquiry (NR03) transaction, and information regarding Mini Spec documents. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

[Resources For DMV Investigations, Part 1: Law Enforcement Programs Overview, Investigator and Fraud Integration, and the Fraud Detection & Remediation \(FDR\) Program](#)

June 1, 2017, 2:00 - 3:00 pm (ET)

This two part webinar series will provide a look into services and products offered by AAMVA for those working in all areas of DMV investigations. Attendees will hear from experts in a variety of fields to learn how AAMVA investigative related resources can be utilized and learn how to maximize their potential to enhance investigative success. This first session will share information on the strategies and resources compiled by the DMV Investigator Integration Working Group along with providing details on how these strategies and resources are being implemented. A discussion of AAMVA and the Law Enforcement Standing Committee mission and goals will provide insight into the role and responsibility DMV investigators perform within the AAMVA community. One of AAMVA's most popular fraud fighting resource, the Fraud Detection & Remediation (FDR) training program, will be detailed with a focus on how it can be utilized by those working DMV investigations. This webinar is for anyone working in and around DMV investigations including front line investigators, supervisory staff, and administrators. Attendees will benefit by attending one or both sessions and can view a previous webinar by visiting the AAMVA website.

JURISDICTION NEWS

Pennsylvania Governor Wolf Signs 'REAL ID' Bill Into Law

Pennsylvania Governor Tom Wolf signed Senate Bill 133, known as the Pennsylvania REAL ID Compliance Act (Act 3 of 2017), which will allow Pennsylvania to offer residents an optional REAL ID-compliant driver license or state identification card, which can be used to access airports, and federal facilities. Under the federal REAL ID Act, beginning January 22, 2018, residents in states that have not come into compliance with federal requirements or obtained an extension will need to show an alternative form of identification such as a passport at airports and when accessing federal buildings and military bases. PennDOT anticipates the U.S. Department of Homeland Security will continue to issue extensions to Pennsylvania until REAL ID products are available for residence. Under SB 133, no Pennsylvania resident will be required to get a REAL ID-compliant driver license or identification card, but residents who choose to do so will be able to use those forms of identification when the new federal requirements go into effect. Mark Lowe Named Director of Iowa DOT

Iowa Governor Kim Reynolds announced Interim Director of the Iowa DOT Mark Lowe will serve as the department's permanent director, effective immediately. He's served as interim director since Nov. 29, 2016. Previously, Lowe served as director of the Iowa DOT's Motor Vehicle Division and general counsel to the Iowa DOT. Lowe also served as Chair of the AAMVA International Board of Directors from 2014-2015. Before entering state government, he was a shareholder with Hopkins & Huebner, P.C. in Des Moines. Lowe has a degree in law from Drake University and a degree in community and regional planning from Iowa State University. He lives in West Des Moines with his wife, Linda. They have four children. FEDERAL NEWS

DOJ Issues Memo on Conditions of Grant Awards for Sanctuary Jurisdictions

United States Attorney General Jeff Sessions has issued a [memorandum](#) clarifying the Department of Justice's stance regarding provision of grant funding to "sanctuary cities." The memorandum states that the Department of Justice (DOJ) will require jurisdictions applying for certain Department of Justice grants to certify their compliance with federal immigration law as a condition for receiving an award. Any jurisdictions that fails to certify compliance with federal law will be ineligible to receive such awards. The certification requirement will apply to any existing grant administered by the Office of Justice Programs and the Office of Community Oriented Policing Services that expressly contains the certification condition and to future grants for which DOJ is statutorily authorized to impose such a condition. The memo also defines sanctuary jurisdiction to refer "only to jurisdictions that 'willfully refuse to comply with 8 USC 1373.'"

FMCSA Delays Entry Level Driver Training Final Rule

The Federal Motor Carrier Safety Administration (FMCSA) has [delayed](#) the effective date of its final rule regarding "Minimum Training Requirements for Entry-Level Commercial Motor Vehicles Operators." This final rule was initially effective on February 6, 2017. The action taken by FMCSA, in accordance with the Presidential directive as expressed in the memorandum of January 20, 2017 entitled "Regulatory Freeze Pending Review" temporarily delays the effective date further until June 5, 2017.

FMCSA Seeks Approval for Collection of HAZMAT Information

The Federal Motor Carrier Safety Administration (FMCSA) has requested an [extension](#) of an existing information collection request (ICR) on "Hazardous Materials Safety Permits." This ICR requires companies holding safety permits to develop communications plans that allow for the periodic tracking of the shipments. A record of the communications that includes the time of the call and location of the shipment may be kept by either the driver (e.g. recorded in a log book) or the company. These records must be kept, either physically or electronically for at least six months at the company's principal place of business or readily available to the employees at the company's principal place of business. FMCSA had previously not received comment on the notice published on November 10, 2016.

President Trump Submits Budget to Congress

President Donald Trump has submitted his fiscal year 2018 [budget proposal](#) to Congress. The budget request cites eight focus areas for reforming government and increasing economic growth: health reform; tax reform and simplification; immigration reform; reductions in federal spending; regulatory rollback; American energy development; welfare reform; and education reform. The budget submission would provide for a \$52 billion increase in spending over 2017 amounts for the Department of Defense, with offsets made by targeting reductions in other, mainly domestic spending programs. The budget request provides \$44.1

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

This Week's Webinars

[Understanding MEC Search Inquiry \(NR03\) National Registry System Specification](#)

May 31, 2017, 2:00 - 3:00 pm (ET)

This webinar provides an overview of the NR03 project solution, a detailed explanation of the Mini Specification for the Medical Examiner Certificate (MEC) Search Inquiry (NR03) transaction, and information regarding Mini Spec documents. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

[Resources For DMV Investigations, Part 1: Law Enforcement Programs Overview, Investigator and Fraud Integration, and the Fraud Detection & Remediation \(FDR\) Program](#)

June 1, 2017, 2:00 - 3:00 pm (ET)

This two part webinar series will provide a look into services and products offered by AAMVA for those working in all areas of DMV investigations. Attendees will hear from experts in a variety of fields to learn how AAMVA investigative related resources can be utilized and learn how to maximize their potential to enhance investigative success. This first session will share information on the strategies and resources compiled by the DMV Investigator Integration Working Group along with providing details on how these strategies and resources are being implemented. A discussion of AAMVA and the Law Enforcement Standing Committee mission and goals will provide insight into the role and responsibility DMV investigators perform within the AAMVA community. One of AAMVA's most popular fraud fighting resource, the Fraud Detection & Remediation (FDR) training program, will be detailed with a focus on how it can be utilized by those working DMV investigations. This webinar is for anyone working in and around DMV investigations including front line investigators, supervisory staff, and administrators. Attendees will benefit by attending one or both sessions and can view a previous webinar by visiting the AAMVA website.

JURISDICTION NEWS

Pennsylvania Governor Wolf Signs 'REAL ID' Bill Into Law

Pennsylvania Governor Tom Wolf signed Senate Bill 133, known as the Pennsylvania REAL ID Compliance Act (Act 3 of 2017), which will allow Pennsylvania to offer residents an optional REAL ID-compliant driver license or state identification card, which can be used to access airports, and federal facilities. Under the federal REAL ID Act, beginning January 22, 2018, residents in states that have not come into compliance with federal requirements or obtained an extension will need to show an alternative form of identification such as a passport at airports and when accessing federal buildings and military bases. PennDOT anticipates the U.S. Department of Homeland Security will continue to issue extensions to Pennsylvania until REAL ID products are available for residence. Under SB 133, no Pennsylvania resident will be required to get a REAL ID-compliant driver license or identification card, but residents who choose to do so will be able to use those forms of identification when the new federal requirements go into effect. Mark Lowe Named Director of Iowa DOT

Iowa Governor Kim Reynolds announced Interim Director of the Iowa DOT Mark Lowe will serve as the department's permanent director, effective immediately. He's served as interim director since Nov. 29, 2016. Previously, Lowe served as director of the Iowa DOT's Motor Vehicle Division and general counsel to the Iowa DOT. Lowe also served as Chair of the AAMVA International Board of Directors from 2014-2015. Before entering state government, he was a shareholder with Hopkins & Huebner, P.C. in Des Moines. Lowe has a degree in law from Drake University and a degree in community and regional planning from Iowa State University. He lives in West Des Moines with his wife, Linda. They have four children. FEDERAL NEWS

DOJ Issues Memo on Conditions of Grant Awards for Sanctuary Jurisdictions

United States Attorney General Jeff Sessions has issued a [memorandum](#) clarifying the Department of Justice's stance regarding provision of grant funding to "sanctuary cities." The memorandum states that the Department of Justice (DOJ) will require jurisdictions applying for certain Department of Justice grants to certify their compliance with federal immigration law as a condition for receiving an award. Any jurisdictions that fails to certify compliance with federal law will be ineligible to receive such awards. The certification requirement will apply to any existing grant administered by the Office of Justice Programs and the Office of Community Oriented Policing Services that expressly contains the certification condition and to future grants for which DOJ is statutorily authorized to impose such a condition. The memo also defines sanctuary jurisdiction to refer "only to jurisdictions that 'willfully refuse to comply with 8 USC 1373.'"

FMCSA Delays Entry Level Driver Training Final Rule

The Federal Motor Carrier Safety Administration (FMCSA) has [delayed](#) the effective date of its final rule regarding "Minimum Training Requirements for Entry-Level Commercial Motor Vehicles Operators." This final rule was initially effective on February 6, 2017. The action taken by FMCSA, in accordance with the Presidential directive as expressed in the memorandum of January 20, 2017 entitled "Regulatory Freeze Pending Review" temporarily delays the effective date further until June 5, 2017.

FMCSA Seeks Approval for Collection of HAZMAT Information

The Federal Motor Carrier Safety Administration (FMCSA) has requested an [extension](#) of an existing information collection request (ICR) on "Hazardous Materials Safety Permits." This ICR requires companies holding safety permits to develop communications plans that allow for the periodic tracking of the shipments. A record of the communications that includes the time of the call and location of the shipment may be kept by either the driver (e.g. recorded in a log book) or the company. These records must be kept, either physically or electronically for at least six months at the company's principal place of business or readily available to the employees at the company's principal place of business. FMCSA had previously not received comment on the notice published on November 10, 2016.

President Trump Submits Budget to Congress

President Donald Trump has submitted his fiscal year 2018 [budget proposal](#) to Congress. The budget request cites eight focus areas for reforming government and increasing economic growth: health reform; tax reform and simplification; immigration reform; reductions in federal spending; regulatory rollback; American energy development; welfare reform; and education reform. The budget submission would provide for a \$52 billion increase in spending over 2017 amounts for the Department of Defense, with offsets made by targeting reductions in other, mainly domestic spending programs. The budget request provides \$44.1

billion for the Department of Homeland Security and \$27.7 billion for the Department of Justice for law enforcement, public safety and immigration enforcement programs and activities. The budget proposal includes \$200 billion in outlays related to public/private infrastructure investment, but does not provide specifics on how that investment will ultimately achieve the goal of meeting \$1 trillion in infrastructure funding. The budget again expresses the intention to move air traffic control functions to an independent, non-governmental organization beginning in 2021, with a cap reduction in discretionary spending of \$72.8 billion. The Discretionary Overview by Major Agency is provided on page 42 of the budget.

Region IV Conference Wraps Up

This year's Region IV Conference was held in sunny Seattle, Washington. Attendance figures were terrific with 380 attendees - near record attendance. Attendees had a great three days of informative sessions and fun networking opportunities. Agenda topics included system modernization, mDL, fraud, engaging employees, human trafficking, and much more. This year's charity auction raised almost

\$9,000 with proceeds benefitting the Washington State Patrol Memorial Foundation. In the last 11 years, Region IV has raised almost \$70,000 on behalf of law enforcement charities. Sarah Garcia was sworn in as the new Region IV President, and will host the 2018 Region IV Conference in Big Sky, Montana.

AAMVA Says Goodbye to Sheila Prior, Welcomes Julie Knittle

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. Sheila has had a long and well-respected career in the AAMVA Community, starting at the Missouri Driver's License Bureau, joining the industry side for several years, and serving two tenures at AAMVA. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this [Farewell Video](#).

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

This first session will share information on the strategies and resources compiled by the DMV Investigator Integration Working Group along with providing details on how these strategies and resources are being implemented. A discussion of AAMVA and the Law Enforcement Standing Committee mission and goals will provide insight into the role and responsibility DMV investigators perform within the AAMVA community. One of AAMVA's most popular fraud fighting resource, the Fraud Detection & Remediation (FDR) training program, will be detailed with a focus on how it can be utilized by those working DMV investigations. This webinar is for anyone working in and around DMV investigations including front line investigators, supervisory staff, and administrators. Attendees will benefit by attending one or both sessions and can view a previous webinar by visiting the AAMVA website.

JURISDICTION NEWS

Pennsylvania Governor Wolf Signs 'REAL ID' Bill Into Law

Pennsylvania Governor Tom Wolf signed Senate Bill 133, known as the Pennsylvania REAL ID Compliance Act (Act 3 of 2017), which will allow Pennsylvania to offer residents an optional REAL ID-compliant driver license or state identification card, which can be used to access airports, and federal facilities. Under the federal REAL ID Act, beginning January 22, 2018, residents in states that have not come into compliance with federal requirements or obtained an extension will need to show an alternative form of identification such as a passport at airports and when accessing federal buildings and military bases. PennDOT anticipates the U.S. Department of Homeland Security will continue to issue extensions to Pennsylvania until REAL ID products are available for residence. Under SB 133, no Pennsylvania resident will be required to get a REAL ID-compliant driver license or identification card, but residents who choose to do so will be able to use those forms of identification when the new federal requirements go into effect. Mark Lowe Named Director of Iowa DOT

Iowa Governor Kim Reynolds announced Interim Director of the Iowa DOT Mark Lowe will serve as the department's permanent director, effective immediately. He's served as interim director since Nov. 29, 2016. Previously, Lowe served as director of the Iowa DOT's Motor Vehicle Division and general counsel to the Iowa DOT. Lowe also served as Chair of the AAMVA International Board of Directors from 2014-2015. Before entering state government, he was a shareholder with Hopkins & Huebner, P.C. in Des Moines. Lowe has a degree in law from Drake University and a degree in community and regional planning from Iowa State University. He lives in West Des Moines with his wife, Linda. They have four children. FEDERAL NEWS

DOJ Issues Memo on Conditions of Grant Awards for Sanctuary Jurisdictions

United States Attorney General Jeff Sessions has issued a [memorandum](#) clarifying the Department of Justice's stance regarding provision of grant funding to "sanctuary cities." The memorandum states that the Department of Justice (DOJ) will require jurisdictions applying for certain Department of Justice grants to certify their compliance with federal immigration law as a condition for receiving an award. Any jurisdictions that fails to certify compliance with federal law will be ineligible to receive such awards. The certification requirement will apply to any existing grant administered by the Office of Justice Programs and the Office of Community Oriented Policing Services that expressly contains the certification condition and to future grants for which DOJ is statutorily authorized to impose such a condition. The memo also defines sanctuary jurisdiction to refer "only to jurisdictions that 'willfully refuse to comply with 8 USC 1373.'"

FMCSA Delays Entry Level Driver Training Final Rule

The Federal Motor Carrier Safety Administration (FMCSA) has [delayed](#) the effective date of its final rule regarding "Minimum Training Requirements for Entry-Level Commercial Motor Vehicles Operators." This final rule was initially effective on February 6, 2017. The action taken by FMCSA, in accordance with the Presidential directive as expressed in the memorandum of January 20, 2017 entitled "Regulatory Freeze Pending Review" temporarily delays the effective date further until June 5, 2017.

FMCSA Seeks Approval for Collection of HAZMAT Information

The Federal Motor Carrier Safety Administration (FMCSA) has requested an [extension](#) of an existing information collection request (ICR) on "Hazardous Materials Safety Permits." This ICR requires companies holding safety permits to develop communications plans that allow for the periodic tracking of the shipments. A record of the communications that includes the time of the call and location of the shipment may be kept by either the driver (e.g. recorded in a log book) or the company. These records must be kept, either physically or electronically for at least six months at the company's principal place of business or readily available to the employees at the company's principal place of business. FMCSA had previously not received comment on the notice published on November 10, 2016.

President Trump Submits Budget to Congress

President Donald Trump has submitted his fiscal year 2018 [budget proposal](#) to Congress. The budget request cites eight focus areas for reforming government and increasing economic growth: health reform; tax reform and simplification; immigration reform; reductions in federal spending; regulatory rollback; American energy development; welfare reform; and education reform. The budget submission would provide for a \$52 billion increase in spending over 2017 amounts for the Department of Defense, with offsets made by targeting reductions in other, mainly domestic spending programs. The budget request provides \$44.1

billion for the Department of Homeland Security and \$27.7 billion for the Department of Justice for law enforcement, public safety and immigration enforcement programs and activities. The budget proposal includes \$200 billion in outlays related to public/private infrastructure investment, but does not provide specifics on how that investment will ultimately achieve the goal of meeting \$1 trillion in infrastructure funding. The budget again expresses the intention to move air traffic control functions to an independent, non-governmental organization beginning in 2021, with a cap reduction in discretionary spending of \$72.8 billion. The Discretionary Overview by Major Agency is provided on page 42 of the budget.

Region IV Conference Wraps Up

This year's Region IV Conference was held in sunny Seattle, Washington. Attendance figures were terrific with 380 attendees - near record attendance. Attendees had a great three days of informative sessions and fun networking opportunities. Agenda topics included system modernization, mDL, fraud, engaging employees, human trafficking, and much more. This year's charity auction raised almost \$9,000 with proceeds benefitting the Washington State Patrol Memorial Foundation. In the last 11 years, Region IV has raised almost \$70,000 on behalf of law enforcement charities. Sarah Garcia was sworn in as the new Region IV President, and will host the 2018 Region IV Conference in Big Sky, Montana.

AAMVA Says Goodbye to Sheila Prior, Welcomes Julie Knittle

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. Sheila has had a long and well-respected career in the AAMVA Community, starting at the Missouri Driver's License Bureau, joining the industry side for several years, and serving two tenures at AAMVA. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this [Farewell Video](#).

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

This Week's Webinars

[Understanding MEC Search Inquiry \(NR03\) National Registry System Specification](#)

May 31, 2017, 2:00 - 3:00 pm (ET)

This webinar provides an overview of the NR03 project solution, a detailed explanation of the Mini Specification for the Medical Examiner Certificate (MEC) Search Inquiry (NR03) transaction, and information regarding Mini Spec documents. The intention of this webinar is to help SDLAs learn about and understand the new transaction, which will assist SDLAs in making preparations for the changes. The primary audience for this webinar will be the jurisdictions CDL Managers/Coordinators and Technical Staff that will be responsible for developing, testing and successfully implementing the National Registry II Solution.

[Resources For DMV Investigations, Part 1: Law Enforcement Programs Overview, Investigator and Fraud Integration, and the Fraud Detection & Remediation \(FDR\) Program](#)

June 1, 2017, 2:00 - 3:00 pm (ET)

This two part webinar series will provide a look into services and products offered by AAMVA for those working in all areas of DMV investigations. Attendees will hear from experts in a variety of fields to learn how AAMVA investigative related resources can be utilized and learn how to maximize their potential to enhance investigative success. This first session will share information on the strategies and resources compiled by the DMV Investigator Integration Working Group along with providing details on how these strategies and resources are being implemented. A discussion of AAMVA and the Law Enforcement Standing Committee mission and goals will provide insight into the role and responsibility DMV investigators perform within the AAMVA community. One of AAMVA's most popular fraud fighting resource, the Fraud Detection & Remediation (FDR) training program, will be detailed with a focus on how it can be utilized by those working DMV investigations. Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey; Mina Peters, AK Dept. of Administration; Patrick Anderson; David Nolen, AK Dept. of Administration
Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue

indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Good afternoon Marla,

On Thursday from 1:00 – 2:00 Pam will be presenting the SSN (Alaska; related background & 4-digit SSN) topic. Would you be interested in opening the topic by speaking to the document AAMVA received today from Alaska? You would only be providing the details of the document received as well as answering any questions members may have. I will have the document opened for you and I am anticipating that portion of the topic to not last longer than 15 minutes.

Thank you.

Governance Board
American Association of Motor Vehicle Administrators for the State-to-State
Verification Service
4401 Wilson Boulevard, Suite 700
Arlington, VA 22203

Dear Members of the Governance Board:

In accordance with Uniform Rule 49(b) of the Alaska State Legislature, I am transmitting to you the following resolution passed by the Alaska State Senate:

SENATE RESOLUTION NO. 6

Urging the Alaska division of motor vehicles to advocate for discontinued use of social security numbers as a means of identity verification.

Sincerely,

A handwritten signature in black ink, appearing to read "Liz Clark".

Liz Clark
Senate Secretary

Enclosure
LC/mhl

STATE OF ALASKA SENATE

2017

Source
SR 6

Senate
Resolve No.
6

Urging the Alaska division of motor vehicles to advocate for discontinued use of social security numbers as a means of identity verification.

BE IT RESOLVED BY THE SENATE:

WHEREAS the Constitution of the State of Alaska recognizes that people of the state have a right to privacy and bestows on the Alaska State Legislature the duty to protect that right; and

WHEREAS the legislature must balance the privacy rights of Alaskans with their ability to earn a living; and

WHEREAS, under the REAL ID Act of 2005, a person must show federally compliant identification to enter federal facilities and to travel by air; and

WHEREAS access to military facilities and travel by air are essential to thousands of Alaskans who deliver goods to, provide services for, or work on construction projects or in schools located on military bases in the state; and

WHEREAS many Alaskans must travel by air to get to their places of work, including many employees in the mining, fishing, and oil and gas industries; and

WHEREAS, to allow Alaskans to continue using state identification to access

military facilities after June 2017 and to travel by air after January 2018, the REAL ID Act of 2005 requires the state to offer federally compliant identification cards; and

WHEREAS the REAL ID Act of 2005 requires each state to provide access to information contained in its motor vehicle database to the other states for the purposes of verifying identity and ensuring that a person does not concurrently hold a license in more than one state; and

WHEREAS, to satisfy this requirement, the only multi-state verification system that meets the standards of the United States Department of Homeland Security is the State-to-State Verification Service, which is administered by the American Association of Motor Vehicle Administrators; and

WHEREAS the State-to-State Verification Service requires the last five digits of an applicant's social security number to be uploaded to the pointer file; and

WHEREAS social security numbers contain nine digits, and, for numbers assigned before June 2011, the first three digits correspond to the state in which the number was issued; and

WHEREAS, for those Alaskans who share the first three digits of their social security numbers, a data breach in the State-to-State Verification Service would result in the disclosure of eight of the nine digits of their social security numbers; and

WHEREAS social security numbers can be used for identity theft, one of the fastest growing crimes in America, and for other fraudulent purposes; and

WHEREAS Alaska is a member of the State-to-State Governance Board for management of the State-to-State Verification Service;

BE IT RESOLVED that the Senate urges the Alaska division of motor vehicles, as a member of the State-to-State Governance Board, to advocate for the discontinued use of social security numbers by the State-to-State Verification Service as a means of identity verification; and be it

FURTHER RESOLVED that, should the efforts to discontinue use of social security numbers by the State-to-State Verification Service be unsuccessful, the Senate urges the Alaska division of motor vehicles to advocate for the use of either a nonsequential series of digits or fewer digits from a social security number for identity verification; and be it

FURTHER RESOLVED that the Senate urges the other members of the State-to-

State Governance Board to support the effort to change the social security number data needed to use the State-to-State Verification System in order to protect the citizens of their states.

COPIES of this resolution shall be sent to the Honorable Sheldon Fisher, Commissioner, Department of Administration; Marla Thompson, Director, Department of Administration, division of motor vehicles; the Board of Directors of the American Association of Motor Vehicle Administrators; members of the Governance Board of the American Association of Motor Vehicle Administrators for the State-to-State Verification Service; and members of the Executive Committee of the National Conference of State Legislatures.

Subject: The National Driver Register will conduct a Cleanfile on June 18, 2017

PDPS Participants:

The National Driver Register will conduct a Cleanfile on June 18th, 2017.

Cleanfile is an optional process. It is a means for jurisdictions to refresh the pointers it has on PDPS. NDR replaces all pointers on the PDPS file with the Cleanfile set of pointers sent by the jurisdiction. In order for a pointer to be included in the Cleanfile, the associated record in the jurisdiction must contain a conviction or withdrawal specified in 23 CFR Part 1327 section 1327.5 (a) or in Appendix A to that rule.

To participate in this Cleanfile, please email NDR by June 7th, 2017, and plan to send your file to NDR no later than June 14th, 2017.

Cleanfiles must be submitted via Secure FTP or FTP. Please schedule a test of SFTP/FTP connectivity with NDR before attempting to send the full Cleanfile.

If you plan to participate in this Cleanfile or if you have any questions please contact the NDR Office by sending an e-mail to NDR_Operations@dot.gov<mailto:NDR_Operations@dot.gov>.

Problem: Alaska's Monthly Timeliness and Data Accuracy For CDLIS Messages Review

Problem Number:890

Status: Analysis **Date:** 05/31/2017
Time: 12:36:06 **Creation Date:**07/31/2015
Creation Time:11:27:54 **Created By:** JShifflett

This is a Master Problem with Subtasks.

Progress:

Entered on 05/31/2017 at 12:36:06 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by June 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the April data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 33.33% of its successful Report Out-of-State Convictions (HA) transactions (1 out of 3) within the federal time limit of 10 days

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (5 out of 5) Withdrawal (HW) messages

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 24.32% overall error rate (9 out of 37) Updates to MPR Personally Identifiable Information

CDLIS Data Quality of Pointer Deletions

- Alaska had a 62.96% error rate (17 out of 27) Delete Driver (UE) messages

Please find the April monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 04 April CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal, Updates to MPR PII or Pointer Deletion messages.

Thanks,

Jessie Rogers | Senior Operations Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va. 22203 | 703.908.8264 | jrogers@aamva.org | www.aamva.org

Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by December 16th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **October** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 37.50% of its successful Report Out-of-State Convictions (HA) transactions (3 out of 8) within the federal time limit of 10 days

CDLIS Data Quality of Withdrawals

- Alaska had a 75% error rate (3 out of 4) Withdrawal (HW) messages

Please find the October monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 10 October CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction or Withdrawal messages.

Thanks,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by November 13th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **September** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 12.93% of its successful Report Out-of-State Convictions (HA) transactions (15 out of 116) within the federal time limit of 10 days

CDLIS Data Quality of Pointer Deletions

- Alaska had a 16.67% error rate (1 out of 6) Delete Driver (UE) messages

Please find the September monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2015 09 September CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction or Pointer Deletion messages.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 10/16/2015 at 10:41:44 EDT (GMT-0400) by JShifflett:

Good morning,

Thank you for your response on these errors. AAMVA recommends that AK continue working with the courts to let them know how important it is to report the convictions within the required time and with the correct information.

For the data quality issues, hopefully we see AK become green due to the changes in staff refining error correction processes to reduce unnecessary correction attempts. AAMVA also recommends the AAMVA Systems Training which aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. **NOTE:** All courses are **free** for AAMVA members. Click the following link to view the course catalogue and to register or enroll in a session: <http://aamva.intevista.com>. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We will monitor this tab and the others to see if AK improves. Once Alaska is green for three consecutive months in each tab, we will close that sub ticket for the tab.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 10/15/2015 at 13:16:39 EDT (GMT-0400) by Nichole Tham:
Good afternoon,

Thank you for this notification. Both DMV and FMCSA are aware of the issues noted in the report and DMV is actively working to resolve them. Some factors contributing to the Timeliness/Quality Errors:

The Timeliness Errors are due to staff diligently working the backlog of E-Dispo records that were not reported to DMV by the courts. These will continue to be high until that backlog is caught up. Part of this delay is attributed to the lack of distinction between CDL/non-CDL citations; additional steps are required to identify and manually update CDL citations/pointers in CDLIS, which significantly slows the process. Although DMV has expressed the need for the Department of Public Safety (DPS) to add a "CDL Indicator" to citation forms, both DPS and the Alaska Court System (ACS) has deemed it impracticable. Staff must continue to manually decipher each out of state license record to see if it is a CDL.

The Quality Errors are in part because there has been a large learning curve for staff, and because AAMVA reports multiple attempts to submit the same record as separate errors, which skews the percentages. Staff are refining error correction processes to reduce unnecessary correction attempts which should reduce error compounding overall.

Sincerely,

Nichole Tham

Progress:

Entered on 05/31/2017 at 12:36:06 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by June 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **April** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 33.33% of its successful Report Out-of-State Convictions (HA) transactions (1 out of 3) within the federal time limit of 10 days

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (5 out of 5) Withdrawal (HW) messages

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 24.32% overall error rate (9 out of 37) Updates to MPR Personally Identifiable Information

CDLIS Data Quality of Pointer Deletions

- Alaska had a 62.96% error rate (17 out of 27) Delete Driver (UE) messages

Please find the April monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 04 April CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal, Updates to MPR PII or Pointer Deletion messages.

Entered on 09/29/2016 at 11:58:22 EDT (GMT-0400) by Jessie Rogers:

Good morning,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by October 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **August** data, AAMVA noticed the following issues:

CDLIS Data Quality of Pointer Deletions

- Alaska had a 28.57% error rate (2 out of 7) Delete Driver (UE) messages

Please find the August monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 08 August CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Pointer Deletion messages.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Good morning,

Thank you for your response on these errors. AAMVA recommends that AK continue working with the courts to let them know how important it is to report the convictions within the required time and with the correct information.

For the data quality issues, hopefully we see AK become green due to the changes in staff refining error correction processes to reduce unnecessary correction attempts. AAMVA also recommends the AAMVA Systems Training which aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. **NOTE:** All courses are **free** for AAMVA members. Click the following link to view the course catalogue and to register or enroll in a session: <http://aamva.intevista.com>. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We will monitor this tab and the others to see if AK improves. Once Alaska is green for three consecutive months in each tab, we will close that sub ticket for the tab.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 10/15/2015 at 13:16:39 EDT (GMT-0400) by Nichole Tham:
Good afternoon,

Thank you for this notification. Both DMV and FMCSA are aware of the issues noted in the report and DMV is actively working to resolve them. Some factors contributing to the Timeliness/Quality Errors:

The Timeliness Errors are due to staff diligently working the backlog of E-Dispo records that were not reported to DMV by the courts. These will continue to be high until that backlog is caught up. Part of this delay is attributed to the lack of distinction between CDL/non-CDL citations; additional steps are required to identify and manually update CDL citations/pointers in CDLIS, which significantly slows the process. Although DMV has expressed the need for the Department of Public Safety (DPS) to add a "CDL Indicator" to citation forms, both DPS and the Alaska Court System (ACS) has deemed it impracticable. Staff must continue to manually decipher each out of state license record to see if it is a CDL.

The Quality Errors are in part because there has been a large learning curve for staff, and because AAMVA reports multiple attempts to submit the same record as separate errors, which skews the percentages. Staff are refining error correction processes to reduce unnecessary correction attempts which should reduce error compounding overall.

Sincerely,

Nichole Tham

According to MAP-21, States are required to be green by September 2015. Your SDLA should have resolved all the CDLIS issues. Your SDLA is expected to reply to this message by October 15th with an analysis of the issues noted and a plan to address them. This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported. If you need any help to develop the plan, please let us know.

In our review for the **August** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 6.67% of its successful Report Out-of-State Convictions (HA) transactions (6 out of 90) within the federal time limit of 10 days

CDLIS Data Quality of Convictions

- Alaska had a 18.90% error rate (24 out of 127) Conviction (HA) messages

CDLIS Data Quality of Pointer Deletions

- Alaska had a 22.22% error rate (2 out of 9) Delete Driver (UE) messages

Please find the August monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2015 08 August CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Convictions or Pointer Deletion messages.

Thanks,

Jessie Shifflett | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.
